Governance to be restructured

Council approves reorganization

by Quincey R. Johnson

A task force report that proposes the reorganization of Towson State into six colleges has been passed by the Academic Council. The report also calls for a restructuring of the governance system.

The reorganization will combine departments that are academically related and have similar academic goals

The report calls for a College of Liberal Arts and includes the following departments: English, geography and environmental planning, history,

and environmental planning, history, modern languages, philosophy and religion, political science, psychology, sociology and anthropology.

The College of Natural Sciences and Mathematics includes biology, chemistry, mathematics and computer

science, and physics.

The School of Fine Arts and Communication includes art, music, dance, speech and mass communica-

The School of Education and Instructional Technology includes early

childhood education, elementary education, general education, instructional technology, Lida Lee Tall Learning Resources Center, and secondary education. Business administration, account-

ing, and economics make up the School of Business and Economics. Communication sciences and disorders, health science, health record

ders, health science, neath record administration, medical technology, nursing, occupational therapy, and physical education make up the School of Health Professions and Physical Education.

There is also a College of Continuing Studies and a Graduate School. The report also outlines a design for

a new governance structure. Exact details of academic governance have not yet been defined by the Academic Council.

Council.

The University-wide governing body will be called the University

The University Senate will be made up of representatives from each of the six colleges and schools, president of the Faculty Association ex-officio members, and a student represen-

ative from the SGA.

The University Senate will be in charge of admission standards, academic standards, curriculum, promotion and tenure policy, the academic calendar, faculty standards, library, long-range planning, athletics, retrenchment policy, and program development.

Within each college school the governing body will be called the College/School Assembly or Council. The assembly will be presided over by an elected faculty member or the dean of the college. The Assembly will have representation from each department.

The structure and procedures may vary with the size and complexity of the college.

Each department within the college will have its own governing body. Its jurisdiction will be over areas that affect the department only.

affect the department only.

The change in the University's divisional academic structure was sparked by the Middle States' Evaluation in 1978.

Evaluators said they did not understand the system, and it was an wkward grouping of departments.

Joseph Cox, former vice president

of academic affairs, said that the divisional system evolved from necessity rather than any set plan.

In 1969, Cox explained, former Dean Kenneth Shaw was responsible for all departments on campus. However, Shaw found it necessary to divide his duties with his associate dean.

Eventually, each of the five divisions was under the jurisdiction of a dean.

President Hoke Smith cited four main advantages to the reorganization. First, external visibility for the students and the business world, which makes the school better to incoming students.

Second, there is more immediate interaction among professional faculty in control of the professional school curriculum.

Third, the proposed structure tends to have more status in applying for federal grants.

Finally, reorganization would provide more compact, contiguous administration of the academic portion of the University.

COMPREHENSIVE REVIEW

A LOT HAS CHANGED IN ALMOST 150 YEARS:

- •LOCATION: 4 RELOCATIONS
- •FOOTPRINT: FROM 80 TO 328 ACRES
- •Buildings: from 3 to 44 structures
- •COURSE OFFERINGS: FROM TEACHER EDUCATION TO COMPREHENSIVE LIBERAL ARTS AND SCIENCES PROGRAM
- •ENROLLMENT: FROM 11 TO 21,177, WITH A PROJECTED INCREASE IN 2016 TO 25,000
- •DIVERSITY FROM PRIMARILY MARYLAND STUDENTS TO STUDENTS FROM THE GEOGRAPHIC REGION AND INTERNATIONAL LOCATIONS

COMPREHENSIVE REVIEW

A LOT HAS STAYED THE SAME:

- •GROWTH
- •CONSTRUCTION
- •Parking issues
- •STRONG FOCUS ON TEACHER EDUCATION
- •EMPHASIS ON TEACHING AND APPLIED RESEARCH
- •COMMUNITY CONNECTION LOCALLY, STATEWIDE, AND REGIONALLY
