in a word

The university student body is made up of unique individuals that see Santa Clara in their own way. The Redwood is meant to convey each man and woman's distinct experience, each year it is published. The 2017 edition of the Redwood strives toward taking the stories of the university and its students and summing up each "in a word." At the end of the year, when underclassmen celebrate warm weather and seniors prepare to walk across the stage, every word from the year will come together to typify the whole story of Santa Clara.

A LETTER FROM THE ASG PRESIDENT AND VICE PRESIDENT

SOLIDARITY (să-lə-'da-rə-tē) noun: unity (as of a group or class) that produces or is based on community of interests, objectives, and standards.

While it is difficult to capture the spirit of an entire year, or of the whole Santa Clara experience in a single word, if you just step on campus, it is not hard to see it in action—our values become apparent. It can be found in our classrooms, in discussions and inquiries about new ideas that may one day improve lives and change the world. It can be found on our courts and our fields, where teammates work together and push each other to be the best versions of themselves. It can be found in our extracurricular activities, where Broncos come together to dedicate time and effort to make a positive impact on other students' experiences, and in our greater community.

In a word, Broncos live in solidarity.

As Broncos, we honor many traditions: The Jesuit educational values we were founded on, the importance of competence, conscience, and compassion in our daily lives, and the entrepreneurial spirit of the Silicon Valley, to name a few. Our identity would not be the same without them.

While there will always be challenges to our values and traditions, these challenges have allowed us to come together. We have stood to face these tests and show our unity, and have emphasized just how important our Santa Clara values are to the community that is present here.

We look back at the 2016-2017 academic year and recognize how powerful our solidarity is and can be.

When you look back on our four years here, we hope that the Santa Clara experience has given you the opportunity to connect with those around you and has fueled you to continue in this spirit, in your career, in your life, and future.

In Solidarity,
Lidia Diaz-Fong
Student Body President

Fred Feyzi
Executive Vice President

athletics

Whether they were breathing heavily after a long and arduous cross country meet, congratulating each other after a difficult basketball game or hanging out with their teammates during their downtime, there is no doubt that Bronco athletes were hard workers in their sports. They knew the value of teamwork and the payoff of perseverance. These student athletes were fiercely dedicated to their sport and to their studies.

To sum it up in a word, Bronco athletes had “talent.”

SEAMLESS TRANSITIONS

CROSS COUNTRY TEAM FOLLOWS THE TEAM MANTRA: EXPECT NOTHING BUT BE GRATEFUL FOR EVERYTHING.

Designer: Louise Li *Copywriter:* Benjamin Qian

The cross country team grew and shined again for another season. This season was **Coach Montoro's** 12th cross country season and seventh as the head coach.

"[The performance of the men's team] set the table for us to be the best team we have ever had. [The women's cross country season] was in a transitional year for sure, but this is a great group. While it took a while, the girls have taken ownership of the team, and the future is bright," Montoro said.

Two of the best cross country runners in program history, alum Mary Kriege and alum Grayson Murphy, graduated in 2016.

Coach Montoro expressed his expectation for both teams next season, "to be improved and competing for finishes in the top half of the West Coast Conference," Montoro said.

Training was the major stepping stone to becoming successful in cross country. Athletes spent 50 weeks out of the year training. Athletes started training at 7 a.m. and had special training blocks in the summer in preparation for the big race six months down the road.

"Countless hours of running, cross training, lifting and recovering, all in preparation for two or three big races per season...To put that much time and energy into preparing for the couple of opportunities you are given to prove yourself forces you to be fully invested, both physically and mentally. This isn't a sport where you can get away with not doing so. It means everything to us," **Joey Berriatua '17** said.

Members of both the men's and women's cross country team felt like the team was heading in the right direction, in terms of their performance. In looking towards the future, these athletes felt a deep commitment to their sport, and they were determined to succeed in it.

"We've had some impressive recruits and are returning a lot of talented athletes. Two of our current freshmen, Noe Obermeyer and Marisa Sanchez, are amazing runners and have consistently been in the top pack all year. I'm excited to see what they can do as they continue to grow," **Allison Martinez '18** said.

The athletes are all bonded by the team's mantra: "Expect nothing, but be grateful for everything."

RENEWING AND ACHIEVING

NEW MEMBERS OF THE MEN'S SOCCER TEAM REFLECT ON THEIR FIRST SEASON AT SANTA CLARA.

Designer: Alexis Tong Copywriter: Leticia Guimarães

Making the decision about which college to go to might be one of the hardest choices in someone's life. But for some, this choice might be even harder since it not only affects their academic life but also their athletic career. Before he decided to come to Santa Clara, **Miles Robinson '20** had to face that decision. Robinson aimed to play soccer professionally after college.

"When I came to visit, I felt like the coach and staff were good, and I felt like they'll help me develop my soccer skills better in the long run. I was thinking about the future instead of just for one year," Robinson said.

The dream to be a soccer player may have many different origins. **Matt Golbranson '20** had been playing soccer for as long as he could remember. On the other hand, Striker **Jalani Ambrose '20**, had quite a unique story to why he started playing the sport.

"When I was about six or seven, I had so much energy. My family said, 'We need to get this kid to burn off his energy somehow.' So, they got me to play soccer. Since then, I just fell in love with it. It's the best part of my life," Ambrose said.

No matter how they got started playing soccer, all members seemed to share the same passion for the sport. The dedicated team seemed to be very positive and certain that they would reach high goals in the upcoming season.

"This team has the potential to be champions, both for Conference and Nationals. I'd like to see this team as champions," Golbranson said.

"We have a lot of young talents right now, and I feel like next year we can be really good," said Ambrose.

EXPANDING THE TEAM

OUT OF STATE TRANSFERS ADD TALENT TO THE FIELD.

Designer: Ashley Zhong
Copywriter: Nick Kniveton

The Women's Soccer team has a tradition of recruiting players from diverse backgrounds and locations.

"I really did not know what to expect when I came here; I did not know that here you have many players that are equally good. Here everyone is good. That makes it more challenging. There are so many good players that can play multiple positions. It helps you get better," **Gudrun Arnardottir '18**, a new member of the team from Iceland, said of her experience.

The competition created by the excellent players helped build a strong team bond between the players.

"Our team is super close. I haven't heard or seen one as close as ours. We all just hang out together all the time. Our coaches are awesome. We have a very good group dynamic, and that proves in our success through soccer," Team Captain **Kellie Paey '18** said.

Anjel Brown '17, a transfer from South Carolina, felt this bond immediately after joining the team.

"The team means way more than just soccer. I expect these girls to be there for me, just as they expect me to be there for them. It's definitely a family. We love each other even when we hate each other. We're always there for each other, and I will always remember that," Brown said.

As her final season drew to a close, Brown reflected on her time on the team.

"Santa Clara is going to be really, really good these next few years. They have a lot of really good recruits coming in. Our team dynamic is to work hard for each other, and every game we've gotten so much better and grown as a team. I'm really impressed with this team; they're going to go really far within the next few years and it's already showing," Brown said.

SPIKING THROUGH THE SEASON

PLAYERS GAIN PERSPECTIVE ON BALANCING THEIR COMMITMENTS.

Designer: Cat Durden

Copywriter: Laura Addison

The Women's Volleyball team had a challenging season, with 16 wins and 14 losses. During the fall season, these hard working athletes practiced four days a week and played matches every Thursday and Saturday. They usually spent the first part of practice working on skills like passing, hitting, blocking and serving. At the end of practice, they put it all together and played competitive six on six drills.

Before every match, Coach Jon Wallace guided the team through a visualization. The team envisioned themselves performing their best in their ideal state of mind. Before the team got on the court, they turned off the lights, blasted music and had a dance party in the locker room. This routine got them fired up to beat their opponent.

"The 18 girls on the team this year are pretty special. We hang out all the time during team meetings, practices, weights and everything in between...We have gotten very close this year," Outside Hitter **Madison Dutra '17** said.

From practices four days a week, bi-weekly matches and hanging out, time management was important for these women.

"Balancing my rigorous volleyball practice, conditioning and travel schedule with school is challenging but also rewarding. Being a Division 1 athlete has taught me to take initiative, prioritize my work and manage my time effectively. It took some time for me to learn how to manage my time at first, but I was able to figure it out with the help of my coaches and academic advisors. Now, it's hard for me to imagine my life without volleyball and the time demands that come with playing the game," Libero/Defensive Specialist **Mary Shepherd '17** said.

Although being a part of the volleyball team presented some challenges, ultimately it was worth the effort.

"The work is worthwhile because I love being on the team. Not only do I get to play my favorite sport at the Division 1 level, but I am also surrounded by awesome people who share my passion for volleyball," Setter **Kirsten Mead '18** said.

The team's hard work and dedication has shined through their performance this year.

"[My favorite part is] being able to represent Santa Clara University. It is my greatest honor, and being a student athlete is my proudest title," Dutra said.

SCAB, or Santa Clara Altered Beast, and RAGE, Santa Clara Raging Ultimate Women, are the Men's and Women's Ultimate Frisbee teams. Although they might strike some as just another club sports team, they have some unique features. If you walked onto the field and called out your friend's name, you might not get a response because players have their own unique nicknames, which are always backed up by great stories of how nicknames were chosen.

"Everyone knows each other pretty well; we all have nicknames on the team and that makes it even more personal," **James Kipper '19** said.

Delaney Gray '19, a rookie who joined RAGE a little later in the year, decided to join the Ultimate Frisbee team because she already knew the frisbee throws, from her dad teaching her when she was younger. Gray knew the reason she decided to stay.

"It's such a great group of girls. They are just people who I matched with instantly," Gray said.

The team had a winning streak this season. Their Stanford victory was a big one, considering the Stanford Bloodthirsty are ranked number two in the Southwest.

"We went out, and we won! We scored the last five points of the game. That was probably one of my favorite moments." The win against Stanford was a big moment for the team and for Santa Clara as well, since the university hosted the game, and students had a chance to go and watch it," **Evan Meyer '17**, a team captain who also threw the game winner on Friday, Oct. 28, said.

As for future predictions for the team, most members seemed very positive about it.

"Ultimate as a sport is growing in the US and I can really see how the team can benefit from that," Kipper said.

The team captain also had a positive outlook for how he will leave the team.

"The program will keep growing not just in number but also in dedication. Recently we've been fortunate enough to get very talented new players—guys who are really dedicated to growing this club. In the future, this team, I think, will be competing in one of the Nationals pretty consistently," Meyer said.

BRONCOS ON BRONCOS

THE EQUESTRIAN TEAM WORKS TO HELP EACH OTHER SUCCEED.

Designer: Alexis Tong Copywriter: Leticia Guimaraes

Practicing a sport took a lot of effort. However, when it came to riding, there was an extra challenge: finding a barn near your home. When deciding where to go to college, the presence of an equestrian team could be a highly influential factor.

Riding was incredibly meaningful to the women on the equestrian team.

"I think it's really special to participate in a sport that depends on having an immense amount of trust in a thousand pound animal. It's taught me about having partnerships and working well in collaboration with others," **Lexie Smallwood '17**, the team captain, said.

Each rider had their own personal reasons for why they began riding and why they joined an equestrian team.

"It takes a mental and physical level when you are riding, where you have to think critically and then apply it while you're on a horse," **Maddie Mott '20** said.

In looking at the team dynamic and how it changed, persistence and passion were important.

"I think the commitment is really good this year. Everybody on this team really cares about the sport and really want to ride, and I think that makes a big difference," **Wendy Conaway '18** said.

Despite riding individually, there was no equestrian team without

the "team" aspect.

"Although a lot of it comes from hard work and dedication to practice, I think another huge influence is how close all the individual team members have grown. Our cooperation has been absolutely crucial for working together in the best possible way and has helped contribute to individual wins," Smallwood said.

Julian Fraser '18, who played on the water polo team for two years, was diagnosed with cancer during the spring. From shaving their heads to conducting a swimathon as a fundraiser for Julian's cause, the team dedicated this season to Julian. After every team meeting, they chanted "For J" and wore swim caps and speedos to meets with "JF7," his initials and number, on them.

"A lot of this season is we're trying to play for him and be good teammates, good players, but just have a good season for him—that was our goal of the season," **Reilley May '18** said.

As a group, the captains decided to make playing for Julian the main focus of this season.

"We're going to play the season for [him], with the understanding that we wish [he] were here, we wish [he] were part of the team," **Graham McClone '17**, one of the captains, said.

Sam Toriggino '18 was also close with Julian and agreed with Graham. As for this season, Julian's story acted as an inspiration.

"He's the same old dude, the same old Julian, he's going through all these treatments, but it doesn't really seem like he's missing a beat. In a way, it's pushing everyone even harder sometimes, whether we chant his name, just having him there is super huge. He's still like a member of our team, we're always thinking about him, talking about him, always talking with him," Toriggino said.

However, the deep connection with Julian was not limited only to the members who personally knew Julian. Due to this season's

young team, the new freshmen were able to meet Julian for the first time when they visited him during their Princeton tournament.

"I didn't have as much personal connection to him, so when I first heard about it, I didn't realize how big of deal it was. But then as I got on the team, I got to meet him a couple times. Just learning about how he's just an awesome person, an awesome water polo player, I started to realize the gravity of it more," **Ryan Werner '20** said. "It put a lot of pressure and weight on a lot of guys' shoulders because they wanted to play for J, so I feel like a lot of the guys had that extra stuff they were carrying when they played."

Despite also not knowing Julian, **Mac Carey '20** used Julian's story to drive his own water polo goals.

"For me, it's just like not taking anything for granted, play every practice game, play the same way and play hard for him, because we know that he is not able to," Carey said. "It's obviously negative, but we can also use it to fuel us—to make us play angry and leave it all in the pool."

"The most positive outcome that we've seen as a team has been when we see him and we interact with him. Maybe some physical characteristics are different, maybe he's pale and with a bald head, but it's the same Julian, still interacting just the same, still laughing, still smiling, still making jokes," McClone said.

SWIMMING TOWARDS SUCCESS

WITH PASSION AND DRIVE, THE WOMEN'S WATER POLO TEAM MAKES A SPLASH.

Designer: Ashley Zhong Copywriter: Aneka Khilnani

When making the big decision on where to attend college, the women from the water polo team were drawn to become students because of the water polo program. The university maintained a competitive women's water polo team that continued to dominate during games. The current members drew in future members that were competitive, skilled and passionate for the sport.

"I played water polo all throughout high school and really enjoy the competitiveness and team aspect that water polo has. I knew I wanted to play in college. The success of Santa Clara's team drew me to the school," **Cathy Cantoni '19** said.

After coming to the team, players were quick to realize the value and drive that each and every player brought to the team this past season.

"This team has so much talent, drive and passion. This year, in particular, we have been able to cultivate the drive of each player and maximize our strengths during the game," Goalkeeper **Francesca Puccinelli '17** said.

Players from this team enjoyed spending time together outside practices and games. Many of the teammates lived together. During the season, practices lasted long hours and the team put

even more time outside of the water to strengthen ties amongst one another. Practices focused on keeping the team in shape and on further developing their skills.

The team made a point to have dinner together at least once a week. Usually, even without planned events, the team found themselves spending time together running errands, studying or just sitting down and watching a movie. They were very close-knit.

"Looking ahead at graduation this year makes me sad to think I am soon to be leaving my family," Puccinelli said.

PUTTING IN THE HOURS

THE LONG DAYS PAY OFF FOR MEN'S BASKETBALL.

Designer: Cat Durden

Copywriter: Aneka Khilnani

Rain or shine, midterms or finals, early mornings or late nights, the hours of intense practice persisted for the men's basketball team. The men's basketball team worked hard both physically and academically, as they faced long hours on the court and academic demands. Despite the long hours, the members of the men's basketball team highly valued the lessons they had learned as student athletes and cherished the time they spent together.

"Although I continually feel sleep deprived, I would never trade being a student athlete at SCU for anything. My teammates are like family," **Evan Crawford '17** said.

With 15 members on the team, players felt that the team was like a family who supported them through all that they endured from the long, grueling hours of practice to having minimal time for school work. The team consisted of players from both inside and outside the U.S. Together, they created a team that stayed in sync.

"Regardless of if we are in season or off-season, we socialize and hang out both on and off the courts," **Matthew Hauser '19** said.

Aside from the life-long friendships, the members of the basketball team learned skills that would serve them for a lifetime of success.

"Playing basketball has taught me how to understand the needs of others while continually working towards one common goal," **Tony Lewis '20** said.

The skills the basketball players learned on the basketball court were transferable to any academic or professional setting. Learning the skills of total dedication to reaching a common goal helped when they needed to work together with a diverse group of people. Together, the basketball team excelled as students and as athletes.

SQUARED UP

TEAMWORK FROM THE WOMEN'S BASKETBALL TEAM LEADS TO THEIR WIN AGAINST STANFORD.

Designer: Ashley Zhong Copywriter: Leticia Guimarães

For some, basketball was just another fun and amusing sport. However, for these athletes, the sport was a big part of their lives. It not only gave them the opportunity to develop interpersonal skills and make connections, but it also allowed them to create lifelong memories and friendships.

"I love basketball. It's always been a part of my life because I started when I was young. I just love the competitiveness of it. It's just become a sport where I don't know what my life would have been without," **Marie Bertholdt '17** said.

However, being passionate about the sport was not simply enough when it came to recruitment. It was necessary to show talent and hard work. **Dru Toleafoa '19** was a student from Australia who had a different process when she was recruited to play basketball.

"I knew that I wanted to play at the college level, but my recruiting process was a little bit different because I was so far away. I had to send out videos and highlights, and then I came on a visit. I felt like I had a really good relationship with the coaches and with the team, so that's why I came here," Toleafoa said.

For Taylor Berry '18, there was no doubt that coming to Santa Clara was the right decision.

"Being a member of not only the basketball team, but any athletic team at this time is exciting. Coach Carr and the current staff have done a great job of coming in and helping us. It will be great to see what the future holds for this program after I graduate. The program is only going up from here," Berry said.

No matter how good the individual players were, a basketball team needed teamwork to succeed. Berry, Bertholdt and Toleafoa agreed on their favorite moment since they've been part of the team: beating Stanford on their home court. Looking back on it, the team had fond memories of the game.

"We're just gonna play and do what we do. If it works, that's great. After we won, we just had a big team celebration in the locker room for a straight ten minutes," Toleafoa said.

For Bertholdt, that moment represented more than just a win. For her, "that's when we realized we could really do something and be something."

A HOLE-IN-ONE TEAM

THE MEN'S GOLF TEAM WORKS HARD TO BETTER THEIR PLAY AND BUILD SANTA CLARA'S NAME IN THE GOLF WORLD.

Designer: Cat Durden

Copywriter: Laura Addison

The men's golf team diligently worked everyday to become better golfers. They spent numerous hours of their week practicing and traveling to tournaments. They practiced Monday, Wednesday and Friday by playing eighteen holes, varying in location from San Francisco to Monterey. Typically, they played for four to five hours and got back to campus around 6 p.m. On Tuesday and Thursday, they had mandatory workouts at 6 a.m. and then practiced for about three hours in the afternoon. On top of this, most of the team members also played on Saturday and Sunday. They played in ten tournaments throughout the year, with individuals typically scoring in the 72 range. These tournaments often lasted three days, plus travel time.

This regimented training and travel schedule made it difficult for these student athletes to balance academics and athletics.

"Typically we miss about eight to ten days per quarter. It is unfortunate because they always seemed to be on test days. Because the NCAA has made it so difficult to take tests when we are traveling, many of us like to take them early so we don't miss much the following week or have to take them when we get back. I like to get all my tests and work done the week before so that I am ahead of the syllabus. That way, when I fall behind when I get back, I'm actually just caught up to the current week instead of being behind," **Hayden Shieh '18**, one of the team captains, said.

As a team captain, Shieh was a leader that wanted to build the entire team up to become stronger golfers.

"It's hard to build a team to compete at the highest level. It's the difficulty of that task that drives me to continue playing on the team. I consider the guys a part of my extended family, and they need me there just as much as I need them there," Shieh said.

The team had a very close bond. They were able to work together at tournaments all over the U.S. Traveling together gave them the opportunity to become even closer.

"My favorite tournament to play in is the USF tournament at Olympic Club because of the history that exists at that course. It's a very difficult and historical course. They've hosted many U.S. Opens at that course. I have watched the best professionals play there, so to actually play there myself is an incredible experience," **Charlie Watson '19** said.

Devrath Das '20 agreed with his teammate, Watson, that the USF tournament at Olympic Club was his favorite tournament to play.

"Being close to the USF campus gives fans and students an opportunity to come out and watch us compete in a beautiful city on a championship course," Das said.

The men's golf team shared how being on a team required a lot of hard work and dedication. They also showed how being on a team went beyond simply having your name on the roster. It encompassed workouts, practices, traveling, balancing school and sport life and working together as friends.

BIRDY IS THE WORD

THE WOMEN'S GOLF TEAM
WORKS TOGETHER TO IMPROVE
THEIR GAME IN ORDER TO
PLAY WELL IN CONFERENCE.

Designer: Cat Durden

Copywriter: Laura Addison

To sum it up in a word, the women's golf team persisted. They practiced four days a week for about four hours each day and had mandatory workouts for three days a week. They were headed by Coach Krystal Kelly. Throughout the year, they competed in 11 tournaments. On average, the individual score in tournaments ranged in the 75's. Golf tournaments lasted typically two to three days plus travel time. So, the team missed some school for tournaments.

"I miss roughly seven to eight classes per quarter, as our tournaments are generally on Monday through Tuesday. It's difficult when I miss an exam day because I usually have to take the exam before I leave for the tournament. Most my professors have been pretty understanding and accommodating for my missed classes," **Annie Freman '17** said.

Even with the stress of missing school and weeks filled with practices and workouts, the team stayed strong because golf was what they loved to do.

However, missing school to travel was not all bad. The women's team had a chance to go to some exciting places for their tournaments.

"So far, my favorite tournament to play in has been the Wyoming Cowgirl Classic in Palm Desert. Even though it is always over one hundred degrees, I really love the course and have always performed well there. Our team also goes to Maui for Spring Break to play in Hawaii's home tournament at Kapalua. This spring break will be my first year going to play, and I already know this tournament will be my favorite since it's in Hawaii," **Kyleigh Moreno '18** said.

Practicing together and traveling lent itself to strong friendships amongst the women on the team.

"My favorite part about being on the team are the lifelong friendships I have made with my teammates. We are all incredibly close, and I consider them to be my best friends. I love being on the road with my team and joking around. I couldn't imagine being on any other team with any other group of girls," Moreno said.

Isabella Salant '18 agreed with her teammate on her feelings about the team. The team's strong bond was evident through their continued ritual before every tournament.

"Before we tee off, we always come together as a team, hold hands and say a little prayer. Our team captain, Annie, always speaks for us and says very encouraging words that motivate us to go out and play the best we can. We then follow this by hugging each other and motivating each person again. We have done this every tournament since my freshman year, and it will continue even after I graduate," Salant said.

The women's golf team showed remarkable progress this year. Their perseverance guaranteed that the team would continue to succeed throughout the years.

The men's tennis team worked hard to recruit the best players from all across the globe. This year, the eight person team included three international students from Greece, Spain and England. **Sebastien Mathieu '18**, a player originally from England, detailed the diversity on the team.

"My first year, our whole team was international. One player from Australia, one from Russia, one from Armenia, one from Georgia the country and finally two from the U.S.," Mathieu said.

After the seniors graduated last year, the team was left with a majority of underclassmen players. This change offered the returning players the opportunity to become leaders for the new members of the team.

"I'm trying to be more of a leader. I'm one of the older guys on the team. We have a pretty young team, It's five sophomores, two freshman and two juniors," **Kamran Khan '19** said.

The leadership of the returning players, along with the team's new coach, **Niall Angus**, helped advance the team.

"Our team has grown a lot. Last year, it was a little broken up. Coach Angus is awesome. He's been the backbone for our team and has really been huge for our team. He's leading us and causing everyone to grow," Khan said.

One of the areas the team grew was in regard to the international players. At first, the language barrier was challenging. However, the challenges were quickly overcome through hard work and extensive training.

"Our coach had zero tolerance on being late. Three days of the week, we had conditioning very early in the mornings," Mathieu said. All their hard work, training and strong leadership yielded positive results.

"Our season has just started, and it is going well so far. We are at 4-1 in matches. Our team just had a good win against LSU, which is a University ranked 36 in the country for tennis," Mathieu said.

The team had a positive outlook for the rest of the season and felt that they continued to excel in their sport.

Every college student knew that balancing academic demands, sleep, working out and friends could be tough. Adding a sport to the mix seemed nearly impossible for most. Yet, the women's tennis team never let their three hour practices, which happened six days a week, get the best of them. All of the players agreed that handling the hectic schedule of tennis made them realize that they could handle anything. This helped them to succeed socially, academically and athletically. Even with their busy schedules, they stayed committed to the game and to each other.

The tennis team brought a mixture of talent and strong bonds to their game.

"If we did not have to be on the courts for a game or practice on the weekends, we all wanted to have team hikes, dinners or relaxation time together," **Caitlyn Frankel '16** said.

This year, the team worked extensively to develop chemistry to play together and stay together.

For many of the players, this focus and dedication was acquired long before they ever stepped foot on campus.

"I've been playing tennis since the age of 4 years old. When the time rolled around for college, I was looking for a school that not only had a well ranked program but also had a friendly, happy-go-lucky team. I found that here at Santa Clara," **Elizabeth Stephens '18** said.

Even with all of the hard work that they put in together, these women were able to make friendships that went further than just hitting the ball back and forth.

"The cheering on the sidelines is what really pushes me through difficult matches when I feel like I can not keep going. This has shown me the importance of going and cheering on my fellow Bronco athletes," Stephens said.

The women continued to do their best and attributed much of their success to the good feelings they had when on the court and the support they felt from their team and other athletes.

ADJUSTING TO NEW MEMBERS

CLUB LACROSSE TEAMS RECEIVE TALENTED YOUNG PLAYERS.

Designer & Copywriter: Ashley Zhong

Club lacrosse was one of the most competitive club sports. Both the men's and women's teams had strong leadership, talented young players and determination to meet their goals.

Mallory Hansen '18, the president of the women's club lacrosse team, played lacrosse since sophomore year of high school. The team held the record for the most consecutive attendances at the National Tournament, 13 years.

"The team dynamic this year is incredible. I returned from abroad with a rookie class that is inseparable and full of enthusiasm. The seniors have become incredible leaders. The entire Santa Clara lacrosse women's lacrosse program, alumni, past coaches and current players are a family. We all understand the level of energy, dedication and sacrifice it takes to be a student athlete," Hansen said.

Hansen commented that every year the team changed, which allowed for upperclassmen to step up as leaders and influence the younger members.

As a rookie, **Kelcey Higgins '20** hoped to contribute her skills to the team.

"The team dynamic is a perfect balance of competitiveness and fun, and it's nice to be on the field with such amazing people," Higgins said.

Nick Goss '17, the president of the men's club lacrosse team, agreed with Hansen in that the team underwent change with the addition of many younger players. Three quarters of the team were freshmen and sophomores. However, the team adjusted to the change and was excited for its future.

The men's goal was to make conference's playoff, while the women were determined to win the National Championship.

"The team is dynamic, in the sense that our team is so young. We realize that we are so much better this year, and the guys are putting in so much more work," Goss said.

LEARNING AND IMPROVING

MEN'S AND WOMEN'S RUGBY
TEAMS SHARE WHAT IT TAKES
TO ACHIEVE GREATNESS.

Designer: Alexis Tong

Copywriter: Leticia Guimaraes

While it might have had a reputation of being a violent sport, rugby was not about simply strength and aggression. In addition to muscle power, rules, strategy and dedication were skills required of the rugby team. For these athletes, the hard work was worth it because they were a part of the team.

"Rugby has always been the one place where I felt the most at home and the most comfortable with everyone. I can rely on pretty much every guy on the team, and I know they'll have my back" **Onno Ho '18** said.

Both teams underwent many changes in the past few years.

"We have moved up to third in our division, and we are going to cup finals. We've been trying really hard this quarter. The atmosphere in practice has also changed from having fun to trying to improve. It turned into not just another sport, but actually into an art." **Hala Darwish '19** said.

"About five years ago, we got a new coach. Now, we're definitely a more serious program. We're a lot more dedicated, and we play rugby a lot more competitively," **Tucker Smith '18**, the men's team captain, said.

All this effort for change seems to have paid off, as the sport has been attracting incoming students.

As a freshman, Darwish did not know much about rugby. She had only started playing in college.

"On my first game, when I didn't really know how to play that well, a teammate came up to me and said 'Whatever you do, even if it's wrong, do it wholeheartedly. At least if you're failing, you're failing 150%.' That quote has stuck with me," Darwish said.

The rugby team placed a great importance on giving a sport one's best efforts. The team had "ganas," which meant that they tried wholeheartedly and never gave up.

"Rugby has been the center of my experience here, and it's where I've made such great connections," **Spencer Street '17** said.

Despite the hard work and difficult practices, the rugby team knew that when something was important to them, it made sense to want to give their best.

AIMING HIGH

THE CREW TEAM TRAINS HARD AND AIMS TO ACHIEVE GREAT THINGS FOR THE UPCOMING SEASON.

Designer: Louise Li

Copywriter: Benjamin Qian

Rowers were full time students. They started their day at 5:55 a.m. for practice from Monday through Saturday. Oftentimes, they would have two practices in a day. The struggle to maintain an academic and athletic balance was one of the reasons that some rowers chose to quit after a short amount of time rowing. However, those who were able to find a balance devoted themselves to this lifestyle.

"All rowers think about quitting at least once a year, but each makes the decision to stay or go for different reasons," **Drew Del Toro '17**, a coxswain, said.

To put the mind and body under such an intense training and learning environment, commitment was the key to success.

"The women's rowing team faces a significant challenge in being made mostly of novice and walk-on rowers," **Mikael Stovarsky '17** said.

However, this draining lifestyle did not stop the crew team from achieving greatness. Last season, both the men's and women's team did a great job in a variety of races and regattas.

"I am extremely proud of the team's performance last year, especially with a WCC win and ending 21st in the country at the national championships," **Grant Findlay '19** said.

The women's team also had solid achievements in their last season.

"Last season was a breakthrough season. Although we did not hit the times we wanted in the bigger regattas, we swept in the smaller regattas and invitationals," Stovarsky said.

For this season, the crew team trained throughout the entire winter. They were prepped and ready for the upcoming season. They were confident and expected even more improvement.

"The program has really improved this year. My teammates and I are all working hard and getting stronger, tougher and faster. I think we will see some much faster, solid races this year," **Valerie Bright '19** said.

The varsity team looked forward to winning in their major races, such as the San Diego Crew Classic, which was the largest regatta on the West Coast, and at Western Springs, the national qualifier race.

"Our team has build up incredible depth, and our 2nd and 3rd boats are looking to be competitive with some of our common opponents," Del Toro said.

With intense training, dedication and strategy, the crew team was on the right path to success.

KEEPING THEIR EYES ON THE BALL

THE BASEBALL TEAM
EXPRESSES WHAT IT
MEANS TO BE A PART
OF A TEAM.

Designer: Alexis Tong
Copywriter: Leticia Guimaraes

Being part of a baseball team was a childhood dream for many people. However, not everybody had what it took. The baseball team definitely recognized the hard work that was required to be a member of the division I team. As they got ready to start the season, practices got more intense and their days on the baseball field were longer. But at the end, all the effort paid off.

Outfielder **Tyler Meditz '17**, from Honolulu, Hawaii, looked back on the four years that he has been at Santa Clara and recognized the merit in being part of the team.

"My teammates are some of the greatest people I have met, and I'm so blessed to get to end my college career with this group," Meditz said.

In addition to being a good teammate, passion was an important component of being a part of a team.

"Baseball is currently the #1 priority in my life and it has given me an opportunity to experience life from a much different viewpoint than most will ever have," Pitcher **Travis Howard '19** said.

In reflecting on their choice to come to this school, the team all had similar reasons for their decision.

"It just seemed to be the perfect fit in regards to where I wanted to be, what I wanted to study, the people I wanted to meet and, of course, the opportunity to play baseball," Meditz said.

The team looked forward to the direction that they were headed for the future.

"Overall, the team has become more talented and created a high level of team chemistry. In the next few years, our national competitiveness will continue to get very strong," Infielder **Ryan McCarthy '19** said.

STANDING UNITED

SOFTBALL TEAM LOOKS FORWARD TO THE WESTERN CONFERENCE.

Designer: Louise Li Copywriter: Benjamin Qian

The softball team looked forward to start their season with the Bronco Classic and Santa Clara Invitational, which were hosted in the newly built Santa Clara Softball Stadium.

"The team is pretty excited. This is a big deal for us. It's the first time that we've opened up at home, since the field's been built. The crowd should be good," Head Coach **Lisa Mize** said.

Even though the record did not look promising early on, the athletes were excited for the upcoming long season and confident in their future performance.

"Our team is working extremely hard. We have played some tough opponents. Our record doesn't show how much work we put into each game and each practice. We expect more of ourselves, but we

have a long season ahead of us. By the time we reach conference, we will be prepared and ready to compete hard," **Kelsie Barnard '19** said.

The softball players had a strong resiliency and work ethic as a team. Every player worked extremely hard. Despite the difficult conditioning and exercise, no one gave up. In order to maintain strong team spirit, **Amanda Delfino '17**, the team captain, made sure to emphasize the importance of supporting one another.

"We are each other's biggest fans. We make sure that we let our teammates know that we support them. I feel blessed to have the opportunity to work and lead a group of girls that care about something just as much as I do," Delfino said.

■ COURTESY OF

Micaela Vierra '18 leads the team with a 3.47 ERA and 36 1/3 innings.

■ COURTESY OF
SCU ATHLETICS
Morgan Modesto '20 leads the team with a .372 batting average and six doubles.

When games got tough and the scores seemed bleak, maintaining a positive attitude was important.

"We are always cheering each other on and picking each other up. When we lose a game, we bounce right back and never let it change how we see ourselves. We truly are a team in all regards," Barnard said.

When they reflected on the future of their season and the direction that the team was heading, the team showed confidence and determination.

"I am excited for the future and the direction in which our program is headed. Each weekend that we have the opportunity to get out on the field is a chance for us to prove ourselves," Delfino said.

The season was a learning opportunity for the team. They worked on their strengths and weaknesses and sought to improve themselves for the conference.

"We are learning to work better together on the field and are working on our weaknesses. We have a great opportunity to do well in conference, and that is precisely our goal. All of the games we are playing right now are helping us work towards conference, so that we will succeed when it comes," Barnard said.

THE SMALL LEAGUES

HAVING FUN IN INTRAMURALS ARE MORE IMPORTANT THAN WINNING THE GAME.

Designer & Copywriter: Louise Li

■ **COURTESY OF CAMPUS RECREATION**
Volleyball team members have intense practices in the gym.

■ **COURTESY OF CAMPUS RECREATION**
Intramural volleyball team shares their athletic spirit both during and after practices.

Intramural sports were structured for players to compete on more of a recreational level. To join an intramural team, you did not have to be very experienced at playing sports. All you needed to do was seek the spirit of fun.

Intramurals attracted students with various levels of skills and brought them together. It encouraged them to stay active with their passions and interests.

"I really want to do intramurals at Santa Clara just to stay active and meet new people on the way. I knew a couple guys, and we were talking about [joining]. We knew we had to sign up pretty soon, and then we just got mutual friends that came together. It was a lot of fun, and I enjoy playing with them," **Chris Tennant '20** said.

While the big leagues were filled with competitiveness and intensity, intramural sport teams had a more relaxing and fun ambience.

"Intramurals don't take much time. It was like an hour for each, and both of them were at night. So, I just try to finish my work before, and even if I don't, I can just work afterwards. It is just a nice break from the work," **Ricky Matthews '19** said.

Intramurals provided a nice balance between academic learning and extracurricular relaxation. These activities were an essential part for students' campus lives.

"Intramurals are important because it's like the step between recreational sports and club sports. People could still play sports, but they do not have to dedicate a bunch of time to practice and be committed to it. Instead, it's like an hour a week. It is just a good time to play with your friends and have fun," Student Coordinator **Kevin Cance** said.

GO BIG AND GO BRONCOS

APB EVENTS GET BIGGER AND BETTER.

Designer & Copywriter: Alexis Tong

Thanks to the hard work of the APB team, Walk the Moon, Sage the Gemini, Gym Class Heroes and many other famous names have been brought to the stage of Locatelli Student Activity Center in the past few years. In upcoming years, there are only bigger and better things to look forward to.

The Fall and Spring concerts hosted by APB are easily the two on-campus events that students look forward to most during the busy academic year. But instead of two separate concerts, APB decided to break tradition and throw one big concert at the end of the school year.

"This was a good turning point. We really wanted to do something that goes along with the theme of our five year plan which is just bigger and better events," APB Director **Njideka Akudinobi '17** said.

When asked what inspired this change, all of the APB board members gave the same response—the students.

"We're only doing one concert, so we can bring a bigger name to campus and really incentivize as many students as we can to come," Specialty Events Manager **Pedro da Silva '19** said.

Ranging from quarterly midnight breakfasts to special events like "Comedy Night with Guest Star Brandon Wardell," APB events are always an enjoyable time. But, what lies at the heart of every fun-filled activity is the ever-growing sense of community within the student body.

"I love seeing everyone come to events and have a great time... They'll come to events and they'll find other people that they're friends with there, and they'll meet their friends and it's just a bigger community growing at every event," Junior Events Planner **Charlotte Arrouye '18** said.

When asked what she hoped to leave behind as the director of APB, "I just really want to be able to connect student opinions and admin opinions... to get the admins to understand that this is what the students want, and this is what student life can look like because we are the biggest programming board on campus. Our purpose is to serve students, and I just want that translated," Akudinobi said.

TRANSFORMING TRADITIONS

ASG TAKES ACTION TO REINFORCE SANTA CLARA TRADITIONS.

Designer & Copywriter: Ashley Zhong

Riding the Bronco Statue before graduation. Attending senior night or sporting events with your whole class. Visiting your first year dorm as a senior. Unspoken traditions like these played a part in the Santa Clara community and shaped every student's college experience. ASG members took it upon themselves to consolidate a Santa Clara tradition.

Spirit Co-chair and Traditions Chair in Community Development **Ashley Wong '19** mainly worked with sports teams, Ruff Riders and the athletics department to create Tailgates and to put on Bronco Week.

"Usually traditions for a lot of schools have to do with their football teams, and we don't have that at Santa Clara. So, we are currently trying to see what we can do," Wong said. "There's nothing like ride the Bronco before this, an annual tailgate, a spirit stick, or something very Santa Clara, 'Go Broncos' tradition, but we want to get [that] started."

As the Student Body President, **Lidia Diaz-Fong '17** had specific ideas regarding creating a new tradition on campus.

"One idea that me and my vice president had was hosting this event called Bronco Day: one day where the entire school comes together and celebrates being a Bronco," Diaz-Fong said. Unlike Bronco Week in which events were all spread out, "Bronco Day would be an all-day event, and it's something that we would like to see come to fruition in the spring quarter."

"Santa Clara has a deep tradition of social justice and engagement, and it's up to ASG and student leaders across campus to foster that on a year to year basis and provide students with opportunities to participate in and really harness that tradition to the maximum possible extent," **Neil Datar '17**, the senate chair, said.

Datar led the senate and oversaw other senators when pursuing projects.

"We want to see these things become ingrained as institutional traditions—things that don't just happen this year but are repeatable by the next generation of leadership and supported by the next generation of Santa Clara student constituents. The things we're doing to build traditions...I hope it continues to last as a tradition that supports the university culture of social justice, civic engagement and awareness," Datar said.

GET UP! GET OUT! GET WILD!

STUDENTS BURST OUT OF THE SANTA CLARA BUBBLE AND COME BACK WITH A LIFETIME OF FRIENDSHIPS, LITTLE MOMENTS AND LAUGHS.

Designer: Louise Li | Copywriter: Aneka Khilnani

Unique to our campus, the popular and well-known club, Into the Wild, provided adventure-seeking students the opportunity to head outdoors and get out of the Santa Clara "bubble." Students at Santa Clara often felt as though they were trapped within a city with a lack of opportunity for exploration, self-reflection and time away from the books.

Students who actively took part in the trips often identified themselves as the "zaniest group of nature-loving granola eaters, mountain summiteers, log-hoppers and life enthusiasts in the Western United States," President **Matt Pierson '18** said.

Friendships in the wild formed quicker than in the city streets of Santa Clara. **Eric Bonilla '17** did not used to describe himself as an "outdoorsy" kind of guy, but after his first trip he was not only

a nature-lover but had cultivated new lifelong friendships that he did not believe he would have aquired by just attending classes.

"Into the Wild was one of my first introductions to college. The first people I met were through Into the Wild, and I've met countless people since then. It's a lot easier to get to know people when you're on a trip in the wilderness together," Bonilla said.

Brazilian exchange student **Anna Nunez '17** commented that Into the Wild Trips have been quintessential in helping her travel and explore California to the fullest.

This was the first year Santa Clara offered an excursion to Hawaii. Students lined up, ready to go to Hawaii for spring break. The trip took place on the Na Pali Coast of Kauai. Students had the

opportunity to backpack the entirety of the Kalalau trail and had a few days of exploring the island while beach camping. Aside from sunny Hawaii, students had the opportunity to go to the East Sierra Ski Odyssey, Green River in Colorado, Zion National Park and the Grand Canyon to see the breathtaking Havasu Falls.

While there was much fun and growth opportunities built into every single Into the Wild trip, leaders ensured safety so that campers were able to execute their trips. Risk and Safety Manager **Wright Hudson '18** discussed some of the things that were done beforehand to prepare for worst case scenarios.

"All leaders have to be certified in Wilderness first aid. Many 'just-in-case' items are packed, and it's not surprising when we have to use them. In Zion, we had to use iodine tablets to purify water, and

a satellite phone to stay in contact with the rest of the group since we didn't have cell service," Hudson said.

While trips seemed to hold promise of freedom, it paid well to be prepared for the worst case scenarios.

All in all, students who partook in trips with Into the Wild had nothing but good things to share. A common misconception was that trips were just for those with a background in hiking, camping and "outdoorsy" people. However, this was far from the truth for Into the Wild. They offered trips for every level of skill and hoped to see all students partake in at least one Into the Wild trip within their four years as Broncos.

KSCU

THE ONLY PLACE ON CAMPUS WHERE MUSIC ALWAYS MATTERS.

Designer: Louise Li Copywriter: Benjamin Qian

While more and more people listened to music using Spotify, Apple Music and other music apps from their phones, radio seemed to be forgotten and cast off by the digital era. However, at KSCU, there was a group of people who were fond of music and broadcasted their love of music on their radio station for other audiophiles to enjoy.

When asked about the importance of KSCU, Production Director **Brandon Mysicka '17** said, "It's a college tradition; all colleges have their own radio station. I think it's important to have a college radio because it is the most diverse radio. Every single DJ does their completely own thing, and they can make their own decisions. That doesn't exist on a radio besides college radio."

KSCU did not only stand for radio.

"We are a culture surrounding albums, album reviews and just talking about it. We also have a blog, we write articles and make playlists. This is a culture of music that needs to be on campus," said Music Director **Sean Mishra '18**.

In reflecting on what being a member of KSCU taught him, "I've learned what it feels like to be in the music industry. There's lots of exciting stuff to do, and you can find out the interworking of how things happen and how albums are pushed down," Mishra said.

"It's taught me that I want to go into music, I've learned that I really have the passion for it and it's the one thing that I

looks forward to, my radio show is my favorite two hours of every single week. It's grown my passion for music that I had and now it's amplified," Music Director **Colleen Devine '17** said.

Most importantly, if you were a big fan of music, KSCU was a place to get to know people who had similar passions.

"I've made some amazing friends at KSCU. I can't geek out musically with most of my friends just because I know too much, but these people get it," Devine said.

Music Director **Alaina Lester '17** also talked about friendship and bonding amongst the members of KSCU.

"I made a bunch new friends. There's a great group of people here who I don't think I'd even run into otherwise," Lester said.

In defining the connection between music and KSCU, "Music is such an important thing, and there won't be that outlet without this club. We'll be missing the massive well-rounded college experience and it won't be as complete without it," Lester said.

TOGETHER FOR DIVERSITY

STUDENTS COLLABORATE TO BUILD A SAFER MULTICULTURAL COMMUNITY.

Designer & Copywriter: Cat Durden

Some may not have thought much when they passed by the Shapell Lounge, the heart of the Multicultural Center, but for many students like **Katrina Li '18**, it was one of the most diverse and safe spaces at SCU.

"For me, it's my second home between classes and to hang out with people and study. This is a very open, safe space for anyone on campus. Everyone is welcome," Li said.

However, the importance of the MCC and its nine resident organizations went much deeper than that. It was a place for marginalized students to relax and relieve themselves of the cultural oppression and pressure they faced on a day-to-day basis.

"The MCC as a whole is a safe space for individuals within different communities. It's for students who might feel at odds sometimes when they enter a classroom...Especially first generation students and students of color that come to this university. Sometimes being the only student in a classroom with brown hair might be a powerful moment in someone's life. We provide a bubble for these students to feel at home when they're facing any sort of mental oppression within the community and we also provide an educational atmosphere for marginalized students.," MCC Director **Isaac Nieblas '17** said.

Many students were grateful for these aspects of the MCC and eventually moved on to take on leadership roles within the organization, so they could promote these concepts of acceptance and multiculturalism throughout SCU. They hoped to draw in

students with the same feelings of kindness and belonging that encouraged them to join at the start.

"I wanted to join because I felt like it was a place where I belonged and where people share the same passions for social justice and understand the struggles that minorities face," **Beverlyn Law '19** said.

Law did public relations for Together for Ladies of Color (TLC), which was an at-large organization working towards gaining residence in the MCC.

"The problem we're trying to tackle is to get greater interest in minority issues and minority rights. For TLC, since we're devoted to both women and people of color, we take an intersectional approach to understanding these issues. We're trying to get

people to understand that we're more than just a race or a gender: we're all of it," Law said.

Despite the challenges the MCC faced involving incidents on campus and obtaining student interest and support, the organization made great progress. The MCC accepted the Korean Student Association, KSA, as a new resident organization.

Li said, "They've only been on campus 2 years, but what they've done since then is incredible... [They provide] a new aspect of the cultures not being experienced much on campus."

The addition of new resident organizations in the MCC garnered interest among the students joining these clubs. Together and in solidarity they worked towards developing a more diverse and understanding cultural climate on campus.

■ **LAURA ADDISON**
Alexis Tong '18 and Letícia Guimarães '19 collaborate on a spread design.

Students were well known for keeping themselves busy. They were involved in a variety of activities that showcased their wide range of interests, talents and relationships. The Redwood found ways to capture these diverse interests within one book that could be savored for generations to come in one concise, cohesive memory.

While the staff was busy designing, photographing and interviewing students to try to highlight the best aspects of each year, they were also busy creating memories together. Members of The Redwood staff were often a part of the staff for not just a fleeting year but for all four years at Santa Clara. Editor-in-Chief, **Vivian Stoneking '17**, has been on yearbook staffs for ten years. She began focusing on documenting others' memories back in middle school and has not stopped yet. As the editor-in-chief, The Redwood blossomed from a smaller aspect of her life to a major aspect of her life.

"Yearbook is on the mind everyday; there is always an email to send, people to contact, things in the office and most importantly being there for any staff members who need guidance," Stoneking said.

"It has been a great opportunity to make friends outside of my engineering major and have deeper friendships with those in other fields," Copy Editor **Angelina Poole '18** said.

Stoneking, along with **Ali Romley '17**, managing editor, had the opportunity to take what they needed outside of The Redwood room into the community. They had the opportunity to congregated with other CSOs on campus and train with them to ensure that, as leaders, they were making a larger impact on the campus community. Others saw themselves blossom as individuals by working on staff.

"I've always been a shy and kind of a reluctant person. Before coming to SCU, I never liked to put myself out there and actively join events or organizations even though I showed some interest. I've really been enjoying being on staff, and I'm glad I did apply. Doing interviews for copy and working together with the staff has helped me be more comfortable in interacting with new people and events in life," Personalities Editor **Bernice Wang '17** said. Wang was a member of the staff for four years.

Being able to approach new people and attend unfamiliar events is a crucial aspect of being on staff and can really help others learn how to express themselves. This is a skill we often do not have the opportunity to learn about in school but is quintessential for the working world that lies ahead.

"I've learned skills that I would not have learned inside the classroom, such as being in charge, checking in on others and making sure they have the resources to successfully complete their work. This is something that you do not get the opportunity to practice within the classroom setting," Poole said.

Not only did working at The Redwood allow staff to learn essential skills, but it also forged lifelong connections in the process. Whether it is during an interview for copy about someone's club or sport or bonding during lengthy work sessions the day before the deadline is due, these friendships highlight the importance of having a yearbook.

READ ALL ABOUT IT

THE SANTA CLARA COVERS THE HARD HITTING STORIES OF THE YEAR.

Designer: Cat Durden
Copywriter: Laura Addison

The Santa Clara published a newspaper every single week, and they printed a thousand copies for each issue. The staff prided themselves on printing hard-copies of their newspaper, in addition to having the newspaper available online. Their articles were shared through Facebook, Instagram and Twitter. *The Santa Clara* has won many awards, including "The Pacemaker" award, which is the top award given in collegiate journalism.

In *The Santa Clara*, one could find articles covering live events on campus. The staff covered more hard-hitting pieces like the OMC leak and the 43 student memorial vandalization.

"Writing about these deeper issues has made me feel like the staff is making a change for the university, and that we are doing something for the greater good. We are not just filling up space; we are writing stuff that people can connect with and relate to...stuff that speaks to them," Editor-in-Chief **Sophie Mattson '17** said.

The staff's journalistic abilities made *The Santa Clara* a force to be reckoned with.

"Not a lot of people know that the school has a newspaper, but the staff likes to think that has changed. People have been sharing our online articles more on Facebook, and *The Santa Clara* as a news source is getting around more on social media. *The Santa Clara* staff are often the first people that report on the breaking news that happens around the university. With regards to the OMC hack and The Hut closing down, *The Santa Clara* were the first people the media contacted to get the big story," Managing Editor **Jimmy Flynn '18** said.

With all of this news to cover, schoolwork was hard to fit in.

"It is tricky to find a balance, but what continues to be my motivation is that the staff just cares and really enjoys the final product. When the staff goes out and can pick up this thing we have produced, we just get this feeling of accomplishment that pushes us to keep working hard," News Editor **Jenni Sigl '17** said.

The staff also knew how to have fun on top of this hard work.

"My favorite part [of the staff] is the people. On Wednesday nights, we're locked in [*The Santa Clara*] for seven straight hours proofreading, editing, adding photos and making everything print-ready," Flynn said.

To keep them laughing throughout the long hours, they had a wall of quotes of all the funny stuff that they said.

"You will never have bigger belly laughs than in the newsroom. I just love working with all these people. The richest moment in life is not about what you are doing but who you are doing it with," Flynn said.

The Santa Clara Community Action Program, more commonly known as SCCAP around campus, was a community-based, service organization that was dedicated to applying activism and justice in order to address social issues in and around the campus community. SCCAP promoted compassion, social awareness, and leadership for social justice. Students often noted being trapped in the so-called "Santa Clara Bubble," where the vast majority of students came from an affluent background and were not stressed about paying rent, did not lack educational opportunities, and could easily find empowerment around the campus. Unfortunately, within the campus' backyard of San Jose, there were many individuals and families who did not share the same privileges as students did. SCCAP participants found solace in seeking out opportunities to recognize that others come from varying backgrounds and were able to come together for a common purpose: to help, to lend a lending hand and to be there for their community. Split into four different departments: homelessness, health and disabilities, education and empowerment, each department in SCCAP worked with different communities to lend a helping hand and expand learning outside the classroom walls.

"SCCAP, coupled with what I have learned within the classroom at Santa Clara, has been a critical part in helping me critically think about how I want to devote my time in the future. It has shown me the impact students can have on younger generations who are the future of this world," Director **Alaina Boyle '18** said.

"Coming into a new community can be difficult. It can be difficult to break barriers that allow community members to open up and let us forge meaningful bonds with them, yet our students continually manage to put people at more ease and create community relationships," Advisor **Lori Durako** said.

SCCAP students worked hard to strengthen their relationships within the community. Students were energetic and willing to volunteer their time and create awareness of these different groups of people on and off campus. Whether they threw a Halloween party for middle schoolers so that they could have a positive experience on a college campus or they visited local elderly homes to share a smile, SCCAP put their heart and souls into the cause.

While many think SCCAP existed solely to benefit those who are afflicted by problems that plague the surrounding community, leaders of SCCAP, such as Associate Director **Elleni Hailu '18**, were well aware that students also gained valuable experience working with SCCAP. The life lessons and self-growth they harnessed from being a part of the surrounding community were unparalleled to anything that would be learned in the classroom.

"I was able to learn that SCCAP provides a way for students to learn from community members' amazing resilience in fighting against the disadvantages they experience. By spending time in our programs, students have the opportunity to educate themselves on social issues they might not be familiar with," Hailu said.

Each year, SCCAP raised the bar when it came to serving the community, and the benefit to students continued to grow significantly. The common goal of learning from those in the surrounding community was selfless and always achieved: being available and present for a community at need, offering support and relentless love, and beaming from new friendships and experiences in a mutually beneficial relationship.

PROFESSIONAL PRODUCTION AT A YOUNG AGE

OWLS SPEND THEIR TIME EDITING, BONDING AND HONORING JESUIT COMMITMENT TO HUMANITIES.

Designer: Ashley Zhong
Copywriter: Aneka Khilnani

■ **NICK KNIVETON**
Stephen Hua '18, Lauren Betschart '17 and Giannina Ong '18 reflect on their latest publication.

■ **NICK KNIVETON**
Nala, the resident dog, checks out the latest edition.

Founded in 1826, the Santa Clara Review was one of the oldest literary publications in the Western U.S. While it may have been one of the oldest publications, it was certainly not stuck to classical forms of expression. The Santa Clara Review staff were fond of showcasing writing with new twists and ideas to create a fresh publication. Writers were tasked with creating two publications each year: one in February and one in May. Submissions were drawn from SCU current students, faculty, staff and writers around the globe. But, the ultimate production of the ever popular literary magazine was run by current undergraduate students. The Santa Clara Review was entirely student edited. The students' quality and commitment reflected the university's commitment to the humanities, a tenet of Jesuit education.

The Review was committed to the development of student literary talent, both editorial and creating writing skills. Ultimately, the Review provided a creative outlet for those sharing and acted as a platform for movement of creative ideas.

Associate Editor **Lauren Betschart '17** was able to cultivate relationships that moved across the borders of the business school.

"I love working on the Review because it exposes me to a whole new creative cohort. I likely never would have crossed paths with this bunch if it was not for the Review; I'm a finance major," Betschart said.

Giannina Ong '17, a nonfiction editor, was often surprised to see the attention the Santa Clara Review received outside of the university community's borders.

"I work behind the scenes for the Review, and one of my favorite things is seeing how far and wide our reach is. People from around the U.S. and from other countries submit pieces for us to pass judgement on," Ong said.

Often, this small but powerful team was left with the daunting task of choosing which pieces capture the heart of Jesuit creativity and spirit for this literary magazine.

While the staff spent a plethora of their time editing and perfecting each line of the publication, once a quarter they were treated to readings or lectures by well-renowned artists in the field. The entire student body and Santa Clara community was invited to share in those moments.

"I am really looking forward to hearing from Raina Leon, a famous poet, author of *Canticale of Idols*...She envisions the Jesuit spirit for her devotion to Latino and Latina arts," **Shelley Valdez '17** said.

While the Santa Clara Review may have seemed like a small publication that was tucked away in a corner of Benson, they were far from it. The Review provided the necessary platform for artists to come together, creatively express themselves and end with a biannual masterpiece. The staff bonded with other writers and artists, not only from Santa Clara, who aided in maintaining a steadfast commitment to the humanities—a true manifestation of Jesuit education.

BRINGING THE SPIRIT BACK TO SCU

RUFF RIDERS MAKE AN
AMAZING COMEBACK
WITH RECORD
ATTENDANCE AT GAMES.

Designer & Copywriter: Cat Durden

cross country team
represent themselves
at the Gonzaga game.

Free access to home games, oodles of school spirit and a welcoming community encompassed the fun benefits of being a Ruff Rider. While Ruff Riders had its place on campus for quite some time, the leadership team made some drastic changes in order to change the campus athletic environment for the better and make it more spirited.

"I joined two and a half years ago, and since then there has been a lot of evolution. When I joined, there wasn't much going on. It was stagnant," Ruff Riders Vice President **Matthew Jacobs '18** said.

Last year, Ruff Riders had only 200 attendees cheering in the student section during two games. This year, there were a minimum of 700 students at several games. A whopping one third of all SCU students went to the Gonzaga game.

Ruff Rider President **Cormac McOsker '18** credited changes to the team structure for the Ruff Riders' recent success. Since he took the role of president last year, they expanded their team by nearly twenty people and utilized better advertising strategies like dorm-storming. Ruff Riders saw some tremendous success, but it did not stop there.

"Our long term goals are to make athletics a reason to go to Santa Clara. We want people to recognize SCU as a school that has an athletic program that, regardless of how many games we win, is a fun program to be a part of. We want going to games, getting excited for them and having fun with friends at games to be a part of Santa Clara culture. It should be something people do on Friday and Saturday nights, not because they're bored, but because it's a fun thing to do," **Matthew Gill '19**, a member of the Outreach Committee, said.

Ruff Riders aimed to change the athletic culture on campus to be more unified and spirited. Being a proud Bronco was all you needed to participate in these events.

"It doesn't matter what year you are, what sports team or club you are a part of; we're all Broncos, and we should enjoy our time together at SCU," McOsker said.

What better way was there to enjoy our time together than to go to games and show everyone what we had to offer?

FRIENDSHIP IN PRAYER

CAMPUS MINISTRY
CREATES SOLACE
THROUGH COMMUNITY.

Designer: Alexis Tong
Copywriter: Aneka Khilnani

The university incorporated many of its Jesuit values throughout the various programs on campus. It prided itself in helping students continue to pursue their faith. Having a community to express one's faith was essential to growing one's faith as an adult.

"Being a member of Campus Ministry has given me a space to explore my faith and what it means to be a Catholic woman in the 21st century. CLC has given me a space to reflect and share my faith journey. Campus Ministry has been a spiritual home," **Alex Arnold '17** said.

Having a space and a community of people to explore these new ideas was essential to consistently taking part in a faith based community.

Other students in Campus Ministry commented on how it created a space to de-stress and helped them find comfort during tough times, as academic challenges persisted.

"My favorite activity is the 9 p.m. Mass every Sunday evening. The music, community and liveliness of Mass always makes me feel at peace, no matter what other events are going on in my life. The dedicated hour of prayer and worship with my friends and SCU community is a great comfort," **Anna Calkins '17** said.

Campus Ministry was more than just finding others of the exact same faith. On the contrary, students were able to interact with others from varying background that all had a faith based goal in common.

"Campus Ministry has opened my eyes to other faiths, whether it be Laura's Bible Study or Interfaith Dinner Discussions. You don't have to be Catholic to be welcomed in CM, and I have met many close friends who do not necessarily share the same faith as my own. CM teaches respect and appreciation of other religions which has definitely helped me grow in my faith," Campus Ministry President **Kaitlin Boone '18** said.

Having diversity of spirituality was essential to fostering a welcoming Jesuit community. The student body was able to find solace and comfort a mutual home of faith-based prayer and community.

CREATING COMMUNITY

CFs SHARE THEIR REASONS FOR JOINING RES LIFE AND SOME OF THEIR BEST MOMENTS.

Designer: Alexis Tong Copywriter: Leticia Guimarães

To many students on campus, the phrase "Res Life" simply meant living on campus. For some others, this term meant a lot more. Community Facilitators, or CFs, were usually known as RAs at most universities. However, here they were known for more than taking care of the residence halls.

Many have wondered why one would decide to apply to be a CF. It was certainly not an easy job.

Javier Ramirez '19, a CF in the Alpha RLC, decided to apply based on his own experiences from freshman year.

"Back when I was in Communitas, I just had some really great CFs that just made a big difference in my experience. I wanted to be able to give that experience to other people too," Ramirez said.

The job of a Community Facilitator presents its own set of challenges and responsibilities needed for the position. Yet, the CFs and

residents had a good time together. **Lindsay Taylor '18**, a CF in the Communitas RLC, proved this to be true.

"The residents are the best part of being a CF because it's just really nice to get a lot of different perspectives on things—things that I wouldn't even normally think about...I feel like the residents really teach me a lot more than I teach them. It's really a learning experience," Taylor said.

For many CFs, the position provided many eye-opening experiences about making connections with others. **Alexa Rojek '19**, a CF for the Loyola RLC, shared a little more about what Res Life meant to her.

"Some people are very much in their bubble, and they can live a perfectly fine life. But, when you get out of your bubble, you realize that there are people you might have silently rejected. When you really start to connect with those people, you realize that everybody

has humanity and deserves to be treated well. That is a rhetoric that we say a lot, but there's a difference between saying it and living it. I feel like I've an opportunity to really live this," Rojek said.

Although Ramirez, Taylor and Rojek agreed there were some challenges in the learning process of being a CF, as well as scheduling difficulties, they all shared extremely positive experiences overall. The community was certainly grateful for all the hard work that the CFs put into building a community.

academics

Coming together from backgrounds in the arts, sciences, business and engineering, Broncos thrived in a rigorous and challenging environment. They were empowered as leaders of change to use their knowledge to impact their community. With opportunities for community-centered learning and hands-on research in all three major undergraduate areas of study, students benefited by learning from experience.

To sum it up in a word, academics were “invigorating.”

WOMEN CHANGING THE WORLD

ARTS AND SCIENCES ADDS
WOMEN'S AND GENDER
STUDIES MAJORS, WHO
HAVE A STRONG VOICE AND

■ **LAURA ADDISON**
Jo Gopinath '19
elaborates on her
opinion in her
WGST class.

Women's and Gender Studies students not only felt as if they had a more accepting and open-minded view of issues facing gender equality, but they also described their studies as identity-building and empowering.

"It's changed the way I interact with people for the better. I feel much more empowered than I ever have before and feel like I know who I am and what my beliefs are, which gives me a great deal of confidence in my day-to-day life," women's and gender studies minor **Aria Berluti '19** said.

Berluti also participated in "The Vagina Monologues," which were a series of true stories written by real women about various issues and topics relating to womanhood that were performed by actors in the form of a play. These monologues are meant to empower women and raise awareness about women's issues. Their impact on campus was to help people be more understanding and accepting.

"With SCU being a Jesuit university, 'The Vagina Monologues' puts difficult conversations and topics out in the open instead of pretending that they don't exist," Berluti said.

After taking classes like Feminist Ethics and Violence Against Women, students often sought to reevaluate and change their perspectives on many topics.

"I have been challenged to constantly reevaluate my own conceptions of feminism and gender as well as those of my peers, professors, and scholars. In addition, I have been inspired to be an agent of change rather than a bystander in issues pertaining to equality," women's and gender studies major **Katie Franke '18** said.

Franke decided to make a difference by studying abroad in Cork, Ireland this fall and joined a feminist society. There, they discussed various issues that affect women and minorities in Ireland today. For

example, Franke mentioned that Irish feminists were desperately battling to repeal the Eighth Amendment, which banned abortion. Women's and Gender Studies prepared students like Katie to face these issues and fight to make a change.

Ali Pietrykowski '17 was also a Women's and Gender Studies major who put her experience to work abroad. Last summer, she travelled with the Global Fellows program and had an internship in Kolkata, India. Pietrykowski worked with the Destiny Foundation, which was a program that helped women who were rescued from the sex trade or were at risk of being trafficked.

"This experience had nothing to do with myself in terms of having a life changing experience or growing personally, but rather in being a witness and ally to a group of women that deserve recognition," Pietrykowski said.

WGST prepared Pietrykowski for her time in India by developing her capacity to understand and accept others as well as think critically about these pressing issues.

"I think my experience would have been very different had I not already spent so much time thinking about my identity and questioning things that I had previously thought to be true," Pietrykowski said.

Women's and Gender Studies proved to not only be a course of study, but it was also a way of developing one's identity to change the world for the better.

NEIGHBORHOOD PROSPERITY INITIATIVE

BUSINESS STUDENTS PROVIDE HELP TO NONPROFIT ORGANIZATIONS.

Designer & Copywriter : Ashley Zhong

The Neighborhood Prosperity Initiative was a program through the Leavey School of Business to reach out to the community. It provided nonprofit organizations with the business skills of Santa Clara University students. For the 2017 fellowship, eight students were selected in the fall and were each assigned to work with different nonprofit organizations for two quarters.

Kate Weber '17, a management information systems major and economics minor, worked with the Center of Employment Training in the public relations and marketing department.

"The biggest impact I see is being able to be a student that still is giving back my knowledge to the community," Weber said. "I didn't expect that I would be able to make that much of a difference, but

now seeing nonprofits, they really could use a business perspective and an outside perspective on some of their work."

Andrew Meylan '17, an accounting major, offered a similar response to the program.

"The significance of NPI is enormous. It really is a mutually beneficial program in that students get to employ their business schools and develop a more foundational understanding of them, and a more robust real-world understanding of how their skills can be applied," Meylan said.

Beyond the usefulness of such a program, Meylan also described how this program emphasizes the goals of the business school as well as the University itself.

■ **NICK KNIVETON**
Business students come in and out of Lucas Hall regardless of the weather.

■ **NICK KNIVETON**
Eli Bonadies '18 and Sam Hahn '18 work hard on their Mike's Bikes project for Business 70.

"The goals of the business school are to create leaders in the business world both in a technical sense and in an ethical sense. With this being a Jesuit school, it strives for interconnectivity, realizing that we're all connected and that all human life is sacred," Meylan said.

Emily Torpey '17, an economics major, had been a part of the NPI program for three years.

"Because I've been so invested in this program, and it has been such a major part of my college career, I'm very passionate about the success and growth for NPI....It is both a learning and growing experience for both groups; students that may not be very aware of the issues, such as gentrification that the community members

face, and the community members that we work with either in the class or as a fellow within our organizations," Torpey said.

Moving forward, the Leavey School of Business aimed to make NPI a yearly program, in which students would apply in the spring, be selected in the summer, and begin working in the fall for a whole year.

CHASING THE FUTURE

ENGINEERING STUDENTS GROW TOGETHER ALONGSIDE TECHNOLOGY.

Designer & Copywriter: Louise Li

Located in the center of Silicon Valley, the Engineering School provided students countless opportunities to learn cutting-edge technologies and innovations. It created a challenging and rigorous environment for students' academic and career development.

Engineering is a broad field. The School of Engineering consisted of a variety of majors, some of which included computer engineering, electrical engineering and bioengineering.

"The goal of a bachelor's degree in engineering is that one can get the necessary skills he or she needs as an engineer. Another goal is to figure out what your specialties are. In fact, getting a bachelor degree in college is all about learning more about yourself and what your interests are. That's the main point of college," **Andrew Song '18**, a double major in computer engineering and electrical engineering, said.

The School of Engineering offered rich choices of courses, which ensured that students were well prepared for their careers.

"In computer science and engineering, the coursework is mostly focused on software and some theories on computer science, but it's leaning more towards applying certain things, especially engineering and applied science; for electrical engineering, during the second year you get to learn basic electric circuits, and then you get to learn more about electronics, linear systems and electron magnetics. Afterward, you get to specialize in what you want to do, such as semiconductors, control systems, robotics or power systems," Song said.

Besides internships, academic research was a shortcut for students to learn cutting-edge technologies and hone their skills.

■ **BENJAMIN QIAN**
TA Kirk Iserman helps students solve problems during the COEN 70 lab.

"In research, I begin to see how many of the things I've learned are relevant. I used most of my knowledge that I learned in class in my research. My career goal is to start working on more research. In the future, I will start going for building devices that would help with the problems that come up recently," **Huong Chau '19** said.

Knowing the world was changing for the better because of technology, engineering students never gave up in the face of challenges.

"For the two bioengineering classes I took yesterday, I don't really understand what they are really talking about yet. Even just hearing about it I got interested and excited, and I'll get to the point where I do understand it," **Cecilia Hemingway '18** said.

With the rapid development of technology, engineering students looked forward to their bright futures. All their hard work in school will be paid back one day when they use their dedication and passion to benefit society.

BON VOYAGE!

ADVENTUROUS STUDENTS POP OUT OF THE SANTA CLARA BUBBLE.

Designer: Louise Li Copywriter: Aneka Khilnani

The idea of studying abroad was brought up on all of the campus tours and for good reason. Dating back to high school, some students dreamed of studying abroad.

"I knew I wanted to study abroad since high school. It had always been a dream of mine. The study abroad advisors were able to help me find a program that fit with my pre-med schedule, so it worked out well," **Josie Daaboul '18** said.

Broncos repeatedly addressed studying abroad as one of the most rewarding decisions they had made during their college years. Studying abroad helped fulfill the wanderlust of travel, without taking a break from studies and prolonging a graduation date. Not to mention, studying abroad boosted an individual's image

with potential employers down the line. Those who partook in studying abroad learned to speak a new language, live with a new perspective, make new friends and try new foods. Most of all, Broncos who studied abroad fed their curiosity by leaping into new experiences, which were set forth through rich educational programs.

Based on Snapchats and Instagram pictures, studying abroad seemed like a picturesque adventure with beautiful cups of coffee, museums and bars to visit and laughs shared. However, before they embarked on this adventure, many students tended to be anxious of the true challenges that were often not captured on social media.

■ **COURTESY OF SEAN SUGIMOTO**

Sean Sugimoto '17 casually sits by a reindeer in Cairn Gorm in the United Kingdom.

■ **COURTESY OF JOSIE DAABOUL**

Josie Daaboul '18 is filled with wanderlust during her study abroad experience.

"I was completely nervous to immerse myself in a country I had never been before. I was most nervous about the language barrier, but I told myself that others had done it before me and had returned with a sense of self," **Alejandra Budar '17** said.

Many were fearful about adjusting to a new country, but they found once they got settled those feelings of anxiety quickly dissipated.

One of the goals that many Broncos had before heading out of the U.S. was to integrate with individuals in the communities of their new countries.

"Besides doing well in school, I hoped to get to know the locals—not just those who are studying abroad with me from the states.

In order to accomplish this task, I went out to different events that many locals would participate in, such as jazz shows every Thursday," **Jessica Andozola '17** said.

Making the effort to go beyond familiar faces was a daunting task for most. After studying abroad, many were able to better adjust to future new environments, such as working with a diverse group of people. While studying abroad, students learned just as much outside the classroom as they did inside.

special features

Four more years passed, and the U.S. Presidential Election was upon the campus once again. Broncos were involved in many events of expression, empowerment and intellectual curiosity. The Ignite Leadership Conference helped Broncos develop into leaders. The Neighborhood Ambassador program helped students transition into off-campus life in Neighborhood Units. In this period of national transition, Broncos made transitions too.

INFORMED VOTING

STUDENTS WORK TO EDUCATE VOTERS ON CAMPUS.

Designer: Ashley Zhong
Copywriter: Nick Kniveton

On Nov. 8, students lined up in the Benson Memorial Center to cast their vote. For many, this was their main interaction with the election. However, for a select few on campus, their role in the election began long before. **Bjorn Thyrring '20**, the president of the College Democrats, was one of those students. He worked to educate voters in the months preceding the election through his club meetings.

"It's about getting Santa Clara students a place they can get politically involved, learn about issues and feel like they're a part of the process," Thyrring said.

This feeling also resonated with other students such as **Patrick Wade '20**.

■ **NICK KNIVETON**

■ **NICK KNIVETON**
A student poses with her "I Voted" sticker after voting on campus.

"One of the main reasons [students] don't vote is that they worry they'll vote for the wrong thing," Wade said.

Justin Azzarito '18, a member of the College Republicans, played a role in helping to alleviate this concern. He focused on ensuring that students were informed on the California Ballot Measures, which was a complicated set of referenda that many students had little information about.

"We want to inform our members who are voting in the state and bring them up to speed on a lot of the propositions. There's quite a few of them this year, a lot of them have some pretty big impacts so we want people to be pretty informed about that," Azzarito said.

This was accomplished through holding meetings, along with debate watch parties.

"We've been having debate watch parties for every single debate. We even hosted the first one with the College Democrats in the library basement. A lot of the time, half is just open discussion. 'What are your ideas on the past week?' And then just overall discussing what we think the outcome of the election might be," Azzarito said.

Thyrring summarized the work of these campus political leaders this year.

"Our whole goal is to get people to the place where they confidently can make their own decision," Thyrring said.

GROWING AS LEADERS

BREAKOUT SESSIONS AT THE IGNITE LEADERSHIP CONFERENCE SPARK STUDENTS' PASSION FOR LEADERSHIP.

Designer & Copywriter: Louise Li

Given that it was the first conference of its kind in university history, the Ignite Leadership Conference was a success. The conference offered breakfast and lunch to its attendees, three breakout sessions, and a networking session at the end. Its purpose was to grant students the opportunity to share their leadership experience with others.

Megan August, a graduate student, gave a presentation on Leadership and Diversity with her partner **Kaylee Hansen '17**.

"We wanted to have a more interactive presentation, so we had white boards for all of the participants. We had a bunch of questions or prompts, and students can then share and look around the room. Our presentation talked about the resources on campus to help people learn more about the culture and different groups of people," August said.

All of the presenters in the conference were highly qualified with leadership experiences. **Pedro Da Silva '19** presented in a session called "Join the Party."

"I was on APB last year as the First-Year Event Manager. I planned all the events for the first-years. This year, I am the Specialty Events Manager, so I take care of all the Bronco buses and all the interesting things that we bring out to campus," Da Silva said.

The conference received positive feedback from the participants. **Connie Jiang '19** attended the conference with her friends and was surprised by the outcome.

"[The presentations] were really helpful in looking at myself. Especially with diversity, we went over what we are good at, and things we could learn more about. I've never thought about it that way, so it really helped me look at what I'm interested in and what do I really know and not know about," Jiang said.

TINY HOUSE BIG DREAM

THE REVOLVE HOUSE WINS
THE 2016 TINY HOUSE
COMPETITION.

Designer & Copywriter: Alexis Tong

■ COURTESY OF TINY HOUSE
The team competes against nine other universities. Every detail counts when setting up the house.

Two years ago, a group of undergraduates from all majors and disciplines created a net-zero, RV industry standard and ADA compliant home for the 2016 Tiny House Competition held by the Sacramento Municipal Utility District. The team's green dreams were realized on October 15 when their rEvolve house took home the overall champion title.

The rEvolve house was crafted not only with simple and sustainable living in mind, but it was also designed specifically for their partner in this project—Operation Freedom Paws (OFP). OFP is a non-profit organization that pairs service dogs with veterans. OFP also provides their clients and their dogs with a 48-week training that ends with a certification of the pair as an official service dog team.

The rEvolve house had many innovative features, including the Colossun solar tracking ring that inspired its name. The tracking ring allows the entire house to revolve as the sun moves across the sky, improving solar efficiency by 30%. However, there is more to the tiny house than what meets the eye. When asked what their favorite feature of the house was, all of the team members struggled in their decision.

"My favorite feature is that our house is so tailored to our client, OFP. We have a kick vacuum that basically sucks up all the dog hair. We also have a kick out dog bowl. So when you kick out the drawer, it pops out with two dog bowls... We have a super huge deck. Some of our clients have PTSD, and they don't necessarily

want to be in confined spaces, so we have extra space on the roof deck as well as the outdoor deck," **Taylor Mau '18**, electrical and architecture team member, said.

Many different sponsors pitched in to make tiny house-living a reality. For instance, materials were donated from SCU alumni and various companies at the Pacific Coast Builder's Conference, adding up to a material cost of \$61,000. The rEvolve home was environmentally-friendly, not only in operation but also in its sourcing as its raw materials came from recycled materials.

"The kitchen is actually really nicely designed. The counter is made of compressed recycled paper and all the cabinetries are made out of the old basketball court at SCU," **Jun Chang '18**, controls team leader and electrical team member, said.

Over the span of two years, little bits and pieces were slowly being conceptualized and put together. The summer before the day of the final competition is when the house finally started to come into shape.

"My favorite memory has got to be the day we put up the SIPs. For the walls, we used structural insulated panels which required a lot more design work ahead of time because they're basically pre-fabricated walls that you then put on top of the trailer and connect with 4x4s. We put up all the walls in one day, and that was the day that it became super tangible. We had a house," **Jon Borst '19**, mechanical and construction team member, said.

THE ARTS ON CAMPUS

CREATE. CONNECT. INSPIRE.

Designer & Copywriter: Cat Durden

On Saturday, Oct. 22, the new Dowd Art Building had its opening, "Community Celebration of the Arts," for students, faculty and members of the community to enjoy and celebrate the arts on campus. The theme was "Create. Connect. Inspire." It resonated throughout the variety of musical performances and artistic demonstrations performed throughout the building and outside. The beautiful new Chihuly sculpture hung proudly over the foyer as guests happily shuffled through and admired the building.

Plans to construct a new art building on campus had been circulating for nearly three decades. Artist and lecturer **Julie Hughes** explained that with this new building, the art department's presence on campus was "invigorating and renewed."

"The building itself I think is really beautiful. And as a painter, I really appreciate the sense of light that the space has. The fact that all the classrooms are wired with technology is convenient, and the communal critiquing spaces and gallery are also really nice," Hughes said, when asked about her favorite new features.

The new Dowd Art Building provided students and faculty with so many new, high quality resources to create with; it really was a beautiful addition to campus. The creation of this new building helped with the university's goal to educate the whole person.

"I think that, psychologically, it's gotta have an impact regarding the university's involvement in the arts and its consideration for it being an important part of the curriculum because in the old building it seemed very makeshift. It was unlike any other department on the fringe and falling apart and stuff. People take us more seriously now that the university takes us more seriously. I think it's also more inviting to students. People like to spend time here now in this welcoming space. It's just nice being in this environment really, and I think that encourages people to take classes here," Artist and Lecturer **Don Fritz** said.

Art was a vital component of a well-rounded education, and the new building reinforced that fact as it welcomed students of all backgrounds to explore their creativity through art classes and studio time.

Furthermore, the Student Art League, known as SCU SAL, was also making great efforts to promote an artistic climate on campus.

Through hosting events and activities where students congregate to share art and create collaborative works, "it's showing the community that art is a priority on campus. We're proving here that people are serious artists and want to engage in an arts community on campus and want to plan art events on campus. We're collaborating with other groups to make people aware and have a more engaged arts community at SCU," SCU SAL President **Ciaran Freeman '18** said.

FROM ON-CAMPUS TO OFF-CAMPUS

THE NEIGHBORHOOD
AMBASSADOR PROGRAM
HELPS STUDENTS
TRANSITION SMOOTHLY TO
OFF-CAMPUS HOUSING.

Designer & Copywriter: Ashley Zhong

Only a year and a half old, the Neighborhood Ambassador Program assisted students with off-campus housing and helped with the transition into the new community. It consisted of four Neighborhood Ambassadors and an Off-campus Area Coordinator, **Callie Rimpfel**, who worked full-time as the head of this program.

"We try to treat those who live in the Neighborhood Unit just like we treat anyone else who lives off campus...We just do some extra communication, since we are their landlord, about health and safety inspections and extra events that we might do. Neighborhood Ambassadors check in on the houses regularly and give them handouts," Rimpfel said.

Brandon Hernandez '17, one of the four Neighborhood Ambassadors, explained the communication between Santa Clara students and the permanent resident neighbors in the Neighborhood Units.

"I'm in this position to help students with off-campus housing, help bridge the gap between on-campus and off-campus and help students who live off-campus transition to that off-campus lifestyle, whether they lived on-campus before or whether they were living somewhere else off-campus. We're also here to help students out

with the transition into the actual Santa Clara community and help integrate the relationship between [the students and neighbors] to make that a smoother process for both. Hopefully in the future, [it will] minimize the amount of disturbances that neighbors have with students from Santa Clara to make that a happier environment," Hernandez said.

Lauren Betschart '17 agreed with Hernandez. She wanted to foster a better environment in which the students could interact and get to know the neighbors.

"As a Neighborhood Ambassador, I really wanted to make sure that we can find better interactions for students and neighbors. So, not at 1 a.m. in the morning when a neighbor is really upset and confronting the student. [An alternative option is] meeting them in a better environment. That's why inviting neighbors to barbecues and going around in the neighborhood, like when we did reverse trick-or-treating, was great for meeting neighbors," Betschart said.

The Neighborhood Ambassador Program was not known to a majority of the student population, but it provided great resources for those who needed them.

FAREWELL TO A SANTA CLARA LANDMARK

AS STUDENTS SAY GOODBYE TO THE HUT, THEIR MEMORIES ARE PRESERVED FOREVER.

Designer & Copywriter: Louise Li

The Hut had been a Santa Clara landmark for around 70 years. It was usually the first place students went to after their twenty-first birthday. For many, it was heartbreaking to hear that The Hut would no longer be open after December 2016.

Not only was The Hut a place for relaxation and entertainment, but it was also a great place to strengthen friendships and meet new people.

"You always go with a group of friends. Everyone is friendly and welcoming. You also went there to see people you wouldn't usually talk to on campus, unless they were among the environment of the bar," **Michael D'Onofrio '17** said.

No matter if you were going out with a good friends or with people who you wanted to get to know better, you would be sure to make unforgettable memories at the Hut.

"There's one night when my friends and I were all there in the backyard. Then, the bartender came out and decided to make up our own drinking game and brought us drinks to play. It was after The Hut had announced its shut down. We sat outside playing this drinking game for like an hour. It was really enjoyable," **Jennifer Mick '17** said.

The Hut had a long history. It was a tradition for students to pin their \$1 bills to the walls, participate in "Dads and Grads" and enjoy "Two for Tuesdays."

"I know a lot of friends who graduated before me who spent a lot of their special nights with their friends there. That's where I found a lot of my fun memories coming out of this summer. It is a landmark to campus because there are a lot of things that the Santa Clara University students share. It is like the central location of our school," Mick said.

Students were disappointed by the closure of the Hut.

"Heartbreaking. So heartbreaking. It is really sad because now we don't really have anywhere to hang out and socialize," **Melene Agakanian '17** said.

Even though the Hut closed down, it was good to hear that school decided to purchase some memorabilia from the Hut. The memories that the Broncos shared will live on forever.

■ **MICHAEL BAKER**
The Hut is crowded with students who seek relaxation and socialization after classes.

IT'S ABOUT LOVE

LOVE JONES SUCCESSFULLY BRINGS STUDENTS TOGETHER THROUGH LOVE FOR EACH OTHER AND THEIR PASSIONS.

Designer: Alexis Tong
Copywriter: Leticia Guimaraes

SUPPORT

■ **LETICIA GUIMARAES**
 Adrienne Garfias '19 and
 Colin Nowierski '19 put on
 a beautiful performance
 and capture the audience
 with their music.

A quarter was never quite complete to fellow Broncos without Love Jones. Igwebuike, the Pan-African student union, founded and ran this memorable event. The quarterly open mic night started out as a small poetry slam that took place in The Bronco.

Due to the great response it received from students all over campus, regardless of their majors, clubs and friend circles, Love Jones grew into a school-wide sensation, complete with live Twitter streams, changing themes and performances that ranged from juggling to band jams.

"[The growth from a club event to a campus wide event] was mainly because there were so many people that wanted to perform. People started to like it as a space where anyone could go on stage and share their talent. It was more like a supportive space, so we opened it up to everyone and anyone who wanted to perform,"

Jasmyne Gaston '18, the co-chair of Igwebuike, said.

Like any good show, the good vibes that Love Jones brought to the community required a lot of hard work behind the scenes. Coordinators and board members of Igwe hustled every quarter to make sure the show went on. It started with getting sign-ups for performances and advertising the show. Then, it got down to the tiny logistics of booking spaces, rooms and equipment.

Despite the time and effort needed to make Love Jones happen, co-chair of Igwebuike and past performer of Love Jones, **Onye Okolo '18** thought that it was worth it.

"It kind of gives you something to keep working towards. It's really cool to have Love Jones every quarter, so you can prepare something and go perform. It's also cool because you get to meet other performers and collaborate with other people," Okolo said.

The coordinator of Love Jones, **Monifa Foluke '17** echoed her board member's attitude.

"I love giving people the space to be happy and perform. A lot of the performers who do go on stage say, 'Thank you guys so much for putting this together,' and they really mean it. That means a lot to me, especially if they're a senior. They're doing it for the last time, and they want to have a good memory," Foluke said.

Love Jones was undoubtedly popular because it was a free and fun show for all. However, what really drew people back every quarter was the way it made everyone on stage and in the audience feel at home.

"One thing I really appreciate about Love Jones is the sense of community. No matter what happened that week or whatever during the quarter, at Love Jones, you're only thinking about you and your friends getting up there and performing. You're surrounded by a whole bunch of people who are there for the sake of supporting other people," Gaston said.

INNOVATION FROM HER EYES

CELEBRATING WOMEN'S ACHIEVEMENT

Designer: Alexis Tong

Copywriter: Aneka Khilnani

Nationally, about 20% of undergraduate engineering degrees were awarded to women. Research showed that women often felt marginalized, especially during internships, other summer work opportunities or team-based educational activities. In those situations, gender dynamics seemed to generate more opportunities for men to work on the most challenging problems, while women tended to be assigned routine tasks or simple managerial duties. SCU was constantly coming up with innovative ways to support women in the field of engineering.

Events were put on throughout the year to support and create collaboration among female engineers.

"The School of Engineering always hosts a Fall Welcome Dinner for Female Engineers that is always fun to go to. I was able to meet more female engineers and be inspired by professional female engineers from the workforce," **Alicia Chan '17** said.

Female engineers at SCU were supported throughout all of their endeavors. Aside from events outside of the classroom, engineering professors helped to cultivate collaboration with women in order support women in the field.

"My professors have always been in my corner. Whether it is staying late after office hours to make sure all my questions are answered or providing clear lectures, they have always been there," **Dayna Obenauf '17** said.

"I believe teachers at SCU are supportive of having more females in the classroom. The professors are so caring. They make sure that during group projects, ideas from every individual are always respected," **Cynthia Le '17** said.

"There is a great network of female engineers there, and it is evident that SCU wants to change the disparities that exist in the current engineering workforce," Chan added.

All in all, SCU ensured that female engineers were able to succeed and equipped them with the tools needed to change the social barriers that exist in our education system.

DUAL LIVES

EMTs ARE AVAILABLE TO SERVE IN RAIN OR SHINE.

Designer: Cat Durden *Copywriter:* Aneka Khilnani

Whenever they were paged, they immediately jumped into action. The pager could go off anytime: at 2 am, in class, at dinner or even while studying for a midterm. They would travel wherever the dispatch told them, all while they carried a bag full of supplies on their backs. Instead of running away, they would go towards destruction: chem lab explosions, broken bones, alcohol overdoses and severe cases of the flu. When they arrived, there was no time to hesitate. They simply did their job and treated injuries as they found them. And when it was all over, they returned to their daily lives as college students.

Many collegiates dreaded getting sick on the same day as a major exam. For students who served as volunteer emergency medical

technicians (EMTs), they also hoped someone else wouldn't get sick. The life of a collegiate EMT was a stressful one, and walking around in a hefty uniform was only the least of their worries.

"In regards to time management, it's definitely a challenge, but I have learned to not save too much critical homework for a night that I am on duty. As long as you plan out your calendar and academic assignments in advance and know all your deadlines, it is easy to schedule around busy times," **Sandhya Bodapati '17** said.

The squad at SCU continued to work together in order to ensure the best outcome for the members of the community.

"The squad is full of eager people and people who love being on

duty. It's never usually difficult to find a cover for a shift that you cannot work," Bodapati said.

Other than taking each other's shifts when needed, the squad made sure to make the long nights fun when they were together.

"I have forged close relationships with friends that go beyond just working together. They are people I always turn to and socialize with," **Tracy Ronquillo '17** said.

"Every night, people hang out at Cowell [where we are stationed] and do homework. You get to know everyone really well, and the older squad members are always happy to help you with your homework because they have usually been through all those classes before," **Maura Redmond '18** said.

In essence, being tasked with the maintaining the health and well-being of others in critical times was no easy feat for anyone, nonetheless a collegiate who was plagued with their own academic demands and friends. However, the EMTs found a way to make it not only work, but make it a fun process.

BEYOND ONE'S OWN WORLD

STUDENTS BROADEN THEIR PERSPECTIVES THROUGH IMMERSION TRIPS.

Designer & Copywriter: Louise Li

College was a place for students' academic cultivation. However, what taught students most about the real world was for students to experience the world outside of the classroom. Nothing was more suitable for students to learn about themselves and about the outside world than an immersion trip. Besides sightseeing, students learned about different cultures and participated in non-profit service to benefit the community.

Kelly Wesley '18 went to Navajo Nation this past winter break for a week. Her experience in Navajo made her realize the value of family and friends.

"I think the biggest thing that I learned is that there's a real emphasis on family in the Navajo Nation. It definitely made me realize that I need to give more attention to my family and friends and put more effort into those relationships. I need to live a more simple life. People there are so connected to their identity, their roots, and their community," Wesley said.

Students who attended the immersion trips agreed that the experiences were essential for their educational growth. They were important not only because the trips broadened their perspectives, but also because the communication with local residents connected with them on a spiritual level.

During the immersion trip, students go hiking together to sightsee in Tubac, Arizona.

"These trips helped cultivate my spirituality by allowing me to truly find what brings me peace. I loved these trips because I was able to find my spiritual center, which I believe will help me in the future," **Raylene Hernandez '19** said.

Immersion trips changed most students' ways of thinking by allowing them to experience the real world beyond college life. The trips had tremendous effects on their personal growth.

"If I hadn't gone on an immersion my freshman year, I would be a completely different person today. You can't really understand the Jesuit mission without going on an immersion

trip because immersion shows you real people out in the world trying to make real changes, whether that's through volunteer work or through politics," **Mikael Stovarsky '17** said.

Immersion trips were a path for students to recognize their true identity and understand the Jesuit mission. Meeting different people broadened their point of view and enabled a more in-depth realization of Christianity and what it meant to see God in someone else.

HOME IMPROV- MENT

INOPERABLE HUMOR
SHOWS THAT THE BEST
PERFORMANCES COME FROM
THE HEART.

Designer & Copywriter: Cat Durden

It was ten years since its inception, and the improv comedy team, Inoperable Humor, was still going strong. Its diverse team and hilarious performances continued to be well-loved by the student body.

"We're just a group of people who likes to get together and play improv games. Most of the time when people aren't very familiar with improv, they've at least seen Whose Line is it Anyway? We play short form games like that, and we also do longer form improv. It is less structured and harder to do," President **Nick Medal '17** said.

The key to good improv was a close-knit team, and Inoperable Humor had it. This year, they worked on getting closer and more comfortable with each other by hanging out and participating in fun retreats like camping trips.

"Inoperable Humor is a combination of doing improv and being with a team. It needs a type of unity that you don't get from other clubs. You make yourself really vulnerable on stage, especially when you're making everything up. It's a magical feeling when you're with a team that really cares about each other and can be themselves on stage," **Farzad Bagheri '18** said.

A strong team bond was important when performing on stage.

"The team is like a little family because the better your relationship offstage, the better your performance is onstage. You have to be comfortable with things like touching each other or acting like significant others," Medal said.

The team's efforts really showed through during their performances. At their first show, they had over 120 people in attendance, which filled the Fess Parker Studio Theater. It was a great success for them to have such a good turnout in a real theater.

The members of Inoperable Humor claimed to have grown significantly as individuals since joining the team.

"The skills that you gain through improv are skills that you can take anywhere with you: public speaking, teamwork, and the ability to think quickly on your feet. These skills that you gain in improv can be used throughout your life," Captain **Josie Warren '17** said.

Warren claimed to live by the key rule of improv, which was also a way of life: "say 'yes,' but don't just say 'yes,' say 'yes and...'"

THE WELL-EDUCATED ACTOR

THE THEATRE DEPARTMENT WORKS TO EDUCATE STUDENTS HOLISTICALLY.

Designer: Ashley Zhong

Copywriter: Nick Kniveton

When choosing a school, theatre students often struggled in deciding between a traditional conservatory or a more modern theatre program within a liberal arts school. Many theatre students chose to study here for the holistic education that the school provided.

"I wanted a liberal arts education because actors need more than just acting techniques or good voice. They also need to draw off of other subjects," **Skylar Adams '20** said.

The liberal arts education was vital to the success of many theatre majors. Many elements of theatre required knowledge in other fields that might have seemed unrelated at first.

"Theatre is a medium of art that encompasses so much and can look at so much. By taking a class in ethics or thermodynamics, you can bring that back to whatever show you're working on and get a stronger sense of what's going on," **Cameron Wells '17** said.

Last fall, theatre students were able to improve their annual fall show through a scientific understanding that likely would not have been present without the education provided by the School of Engineering.

"It's enriching to get a sense of the world in a broader context. We work on very complicated, challenging shows. *Arcadia*, the fall show, touches on chaos theory and the second law of thermodynamics," Wells said.

In addition to the encouragement to take outside classes, the theatre faculty ensured that its students received a well-rounded education by working with them on a personal level.

"We call all of the professors by their first names. That's just reflective of how we're colleagues to them to a large extent. When we're in rehearsal or production meetings, we're collaborating with them...They're trying to get us into the mindset that we're equal with whomever we're working with," Wells said.

By receiving an education that was both holistic and personal, theatre majors were prepared to set foot into the world of acting.

"For me, being able to have that expanse into the liberal arts education helps broaden my horizons in theatre," **Christian Wilburn '20** said.

personalities

Innovative. Entrepreneurial. Passionate. These are just a few words to describe the qualities that a Bronco embodied. From smiling and waving to people on the way to class to putting in hours at the library to being involved with clubs on campus, Broncos did it all.

To sum it up in a word, the Bronco family was “individual.”

BE INTERNATIONAL

VIKRAM HIMATSINGKA '20

Designer: Louise Li

Copywriter: Benjamin Qian

Born and raised in Bangalore, India, Vikram Himatsingka was an undeclared major in the Leavey School of Business. Before coming to college, Vikram studied at Mallya Aditi International School and was the captain of the basketball, cricket and soccer team under his age categories. Apart from sports, he was a member of the Student Council and helped organize events, such as the Blood Drive and TEDxMAIS.

Choosing a college to attend can be a difficult choice for any high school senior. There are a lot of factors that come into play, such as location, cost and size.

"The student population was a key factor that helped me finalize where I wanted to do my undergrad. It wasn't too big where I'd be a mere statistic, and it gave a certain degree of personal attention I needed. The quarter system at SCU allows me to try various classes and explore my interests before pursuing my career. Being on the West Coast was a personal preference that SCU satisfied. The student population is diverse and therefore demands me to go out of my comfort zone and interact with people from various walks of life," Himatsingka said.

No matter what classes students took, their professors always played an important role in exploring course content, expanding the students' interest and even influencing their future decision.

"I like how the teachers make an effort to get to know each student in the class individually and how they are always willing to help whenever you need it. The atmosphere or vibe is laid back and relaxed and does not have the competitive culture other universities do. The campus isn't big, so walking to the gym and dining hall isn't a task," Himatsingka said.

Though Vikram couldn't envision himself five years down the line perfectly, he was excited to try out the variety of core classes that SCU offers to all first year students, such as Critical Thinking and Writing, Cultures and Ideas and even Religious Studies, which is hardly found in other universities' curriculums.

COMING BACK HOME

MIGUEL YUJUICO '20

Miguel Yujuico attended Bellarmine College Preparatory, which was only five minutes away from Santa Clara University. After he finished up his sophomore year at Bellarmine, he moved to the Philippines because of his dad's work and transferred to Brent International School in Manila. Yujuico felt that he had the most growth during the two years he was abroad.

While most people merely shop online, Miguel Yujuico runs an eBay shop himself.

"Essentially, I try to buy broken phones and computers from people, fix them up and turn them into profit. I also sell shoes. I've sold around 55 pairs at this point and am trying to continue the business. I only do this during my free time and wouldn't let it interfere with my study," Yujuico said.

He also took his business into consideration in coming to SCU.

"The environment was a big consideration; it's welcoming, and I felt like it's a good size to me. I don't want to go to college and feel swallowed up and insignificant. Here, I feel like I have some purpose. The general location here, at the heart of Silicon Valley, is also important to keep my business running," Yujuico said.

When looking ahead towards his future plans, "I'm hoping to get a job or an internship here or elsewhere. Hopefully I can get something related with Apple because I love Apple; that's actually one of the main things I deal with in my business. But, I know my main goal is to go back to the Philippines—that's where my future lies ahead. I'm just trying to learn a few things here and bring those experience back home, so I can be part of building my country's great future," Yujuico said.

THE LEGEND CONTINUES

BRIGID RIGALI '19

Designer: Cat Durden
Copywriter: Laura Addison

PUTT LIKE AN EGYPTIAN

HASSAN SAID '19

Hassan Said was known on campus for being one of the most interesting guys you will ever meet. Hassan was an Economics major. He was from Egypt, where he was the youngest of three siblings. In addition, he could speak three different languages: Arabic, German, and English. Said was also a sports star; he was on the Santa Clara Men's Golf team and was the captain of the Egyptian National Golf Team.

"Living in Egypt was the best thing to ever happen to me. I enjoyed living in such a diverse city because it gave me a perspective from which to look at the world with. Witnessing the Egyptian Revolution of 2011 was something so spectacular. Being able to be a part of something like that will forever remain cherished in my heart, and I don't think I'll ever meet people as nice and honest as Egyptians," Said said.

That being said, he loved his time in America and at SCU. "SCU has been very hospitable to me. I enjoy living here very much and rejoice in the fact that I can freely discover myself with so many people with equally exciting backgrounds around me doing the same thing!" Hassan said.

Some random facts about Hassan include: his favorite book was *The Stranger* by Albert Camus because it forced him to find purpose and meaning in his life. His favorite movie was *It's a Wonderful Life* because it taught him to give back to his community and everyone around him. He aimed to change this world and create a better tomorrow for everyone.

Brigid Rigali was a shining star on campus, but she was not the only Rigali that had graced the campus with school spirit and loyalty. Her family has had around 105 members attend Santa Clara University. She felt lucky to go to school with her cousin, Nurhan Sezgin '20, who was a freshman, and she hoped to have another cousin here next year. The tradition did not just stop with Santa Clara itself but also the off-campus sorority, Kappa Kappa Gamma. Her sister graduated from Santa Clara with the class of 2015 and was also a part of the Eta Nu chapter.

Her family always had a Grand Reunion.

"Everyone gets so excited to reminisce on the good ol' days," Rigali said.

Her Gramps loved to share stories about ROTC Wednesdays and the red beanies that the freshmen had to wear at the time during the reunions.

"Every time I come to visit him, he wears his Bronco Letterman Jacket and shows me the picture of him and his friends in the old cafe and bar," Rigali said.

She was constantly reminded of how lucky she was to be able to go to this university, especially with the changes that have happened with the campus.

When she mentioned The Hut was closing to her family, everyone was distraught about a school staple going away. One of her favorite parts about being in an alum-filled family was because it's

fun to meet other born and raised Broncos whose parents or aunts knew her family when they were Broncos.

"The Bronco community is large but close-knit," Rigali said.

On top of coming from a "totally bronco" family, Brigid was very involved on campus. She had never done improv until college, but she found her passion of being on stage and making others laugh by being a member of the school's improv team, Inoperable Humor.

In addition to performing at campus events, the improv team went off campus to compete.

"I was proud of our team last year when we got 3rd at a collegiate Improv tournament, behind Stanford and Cal Poly (SLO)," Rigali said.

Her favorite improv game was called "Exits." In the game, if a character left the stage you followed them to the next part of the reality. This allowed for a little more freedom with characters and always produced a good laugh.

Rigali was also a member of the Executive Council for Campus Ministry's Christian Life Community. With the team, she hosted BBQ's, bonfires, line dancing events and casino nights, which featured the Jesuits as the dealers. She became involved in this organization after the First Year Retreat.

"Although, we identify ourselves as the Christian Life Community, we try and hope to welcome all of campus to our events. CLC is a national collegiate organization; it is cool knowing that SCU shares this ministry with other Universities," Rigali said.

LIGHTS, CAMERA, MAGIC

RAYMOND JACOB FUERTE '18

Designer & Copywriter: Alexis Tong

It is safe to say that Raymond Jacob Fuerte was pretty fearless. From his outgoing personality down to his Disney-themed outfits, Fuerte was unapologetically himself on a day-to-day basis. Apart from being a ray of sunshine to many around him, Fuerte channeled his positive energy into speaking up for justice and speaking up for the more soft-spoken around him from a young age. He maintained a leadership role since fifth grade, was the president of his graduating class every year in high school and ultimately was the president of the entire student body his senior year of high school. Fuerte continued to exercise his talents as he remained an active board member of Barkada Club for all his university years and was the co-chair of the Filipino student organization during his junior year.

When asked what inspired him to be a leader, Fuerte said, "I think I just started out as a very flashy person growing up as a child. I always like to be in the spotlight. I'm never usually anxious. So, I feel like with that skill set, it just comes naturally to me to be able to be a leader and to be able to speak about things that people aren't as well spoken for, like in regards to changing school policies or addressing issues that need to be addressed."

Fuerte came to college as a political science major and switched to a communications major. He felt the need to acknowledge his passion for film production that sparked when his oldest sister landed an internship at Disney World. It transformed not only his outlook on life but also his entire wardrobe.

"If you see someone wearing Mickey Mouse, it's probably me. I wear everything Disney, and I think my childhood has definitely been based off Disney. The imagination, creativity, wonder and magic has shaped me as a person. That's the world I want to live in. I hope that my skillset will enable me to work for Disney in the future," Fuerte said.

More specifically, Fuerte hoped to one day be a part of the production for Pixar animated shorts. His reason was that although they were short in length, they were more impactful because they managed to get a deeper message across to the audience.

"Especially because these Pixar shorts are being shown to children, that's something that really intrigues me. The short that played before Moana was about following your heart in whatever you do in order to be successful in life; if you just follow your mind and do what makes the most money, then you're not gonna be happy," Fuerte said.

Fuerte's mission was to combine his leadership abilities and artistic vision to lead the generation that dictates the future.

"I think a good leader should not only think ethnocentrically, but also world-centrally—thinking about how their small communities, institutions and policies impact the greater community around them. You can be a good leader to the people you see everyday and to the people you're attracted to everyday, but at the end of the day there is a greater call to action that needs to be met," Fuerte said.

BROADENED HORIZONS, BROADENED HEART

MAYA TROMBURG '18

"Where are you from?" was a simple conversation starter to many, but not if you were Maya Tromburg, who had pieces of her heart stolen and kept by the many countries that she grew up in.

"It's just such a difficult question to answer because even though I am a US citizen, I grew up in Japan and India, so those are more of my homes. And growing up especially in international school, kids moved every three or four years. People didn't generally stay in one school for their whole childhood. That was great and kind of a lot because you become friends with certain people, and then they moved away which is always really tough. Fortunately, I've maintained a lot of relationships with my friends," Tromburg said.

Despite being half Japanese and half American, Tromburg spent 10 of her childhood years in New Delhi, India, while her parents decided to further their teaching careers there. Although Tromburg was thrown into a culture that was very different from where she was technically from at the supple age of 3, she loved India through and through and insisted that there was no better place to grow up in. Tromburg spent her teenage years in the metropolis of Tokyo where she reconnected with her culture and experienced freedom in a modern city, which included riding the train downtown by herself.

"I really enjoyed both of my experiences in each place but it was really interesting transitioning from India which is more of a bustling city. Unfortunately, there's a lot of poverty. But, there is also a lot of beauty in the country, and the people are just so welcoming and friendly. India is such a colorful place. Then, it was different going to Japan where generally people seem like they're more reserved, but at the same time they're so polite and passionate in what they do. People just work really hard for their lifestyle," Tromburg said.

Tromburg led a highly mobile life compared to many, but this did not stop her from giving back to all the communities that she encountered during her journey. As the Social Media Chair of SCU International Club during her sophomore year and as a member of the International Student Volunteers Club in the admissions office during her junior year, Tromburg applied her experience as an international student by helping new incoming international students settle in. This ranged from answering questions about life at SCU, helping with immigration forms, taking students on Target runs and moving them into their residence halls, to grabbing dinner with newcomers and being a friend they can count on miles away from home.

All the places Tromburg saw only made her wish to continue globetrotting before settling down.

"I can't really say the exact place, but I definitely want to live overseas when I'm older. I'd love to raise a family overseas and work within the International school community. My family has made such lifelong friends with these families at different schools, and our experiences are just so memorable and amazing in every sense. I think I would definitely love to live abroad when I'm older. I just can't figure out where," Tromburg said.

COUNTING CHANGE

DAVID SLY '17

Designer: Ashley Zhong Copywriter: Nick Kniveton

Ever since he began collecting coins when he was eight years old, David Sly was interested in finance.

"My grandma gave me a book of coin values, and I saw pennies worth hundreds of dollars. I told myself, 'I'm going to find one of those in change one day.'" Sly said.

Over the next few years, he became very good at finding coins worth far more than their face value, and at age 13, he opened an eBay business selling coins.

"Throughout high school, I started scaling it up, sometimes using friends to place orders for me," Sly said.

This experience with entrepreneurship led him to Santa Clara, where he majored in finance and minored in entrepreneurship. Sly helped start a TEDx program on campus. He spent up to four hours a week working on the program.

"There's a group of eight of us that started it up at the end of my sophomore year. We started it up as a club seeing where we could take it... We all took on roles that we were vested in," Sly said.

He worked the finance side of the operation and used the skills he learned through his small business to manage the costs of the event.

"It was pretty expensive so we had to get funding from the school and hold fundraisers to make sure we could put on the event for a reasonable cost...We worked together, got the license and were able to put on a great event. We had our first event back in May. We had eight speakers come: four students and four professionals. We even had the CFO of GoPro and the CMO of the Oakland Raiders," Sly said.

Sly hoped to pass down the ropes to younger SCU students, so the tradition of annual TEDx events will continue for years to come.

THE TRANSHUMANIST

JACK KINGSMAN '17

Traditionally, the human body was viewed as something that can not be "improved." Mainstream medical procedures may have repaired parts of the body that have broken, such as using a prosthetic limb to replace one lost in an accident, but they did not seek to add new features. Jack Kingsman, a senior who majored in Computer Engineering, was a member of a growing worldwide community that looked at the body differently. The "biohacking" community, as it was known by its members, sought to improve humans through tweaking the physical body.

Kingsman first heard about the community during his freshman year, when he read about magnetic implants. After hearing about biohacking, "It hit me like, I can do this," Kingsman said.

After researching the process, he decided to cautiously proceed forward with the implant.

"I set a goal for myself to pass the nursing certification exam before I performed the procedure to handle unexpected eventualities and emergencies. I couldn't actually get a nursing degree, but I was able to accumulate the knowledge I would have needed for it...The surgery was successful and a lot of fun," said Kingsman.

The implant allowed him to sense the size and intensity of magnetic fields around him, but more importantly, it connected him to the biohacking community.

Fondly describing the group, "I love the community. It's fantastic and really driven by science, which is encouraging. It's full of really smart people asking, 'how can we push this mainstream and gain visibility?'" Kingsman said.

With help from them, he decided to further experiment with biohacking. Recently, he implanted a chip that allowed him to store and then wirelessly transmit data to a scanner. Implantable chips have the potential to store important information conveniently, performing many of the equivalent functions the SCU Access Card does: paying for meals, transit, or unlocking digital locks. Kingsman used his implant in combination with his computer to save time. He said, "Rather than typing in my lengthy encryption key, I can just touch my chip to a reader on top of my computer." With his newfound knowledge, he helped author a textbook on techniques for the implantation of chips.

Kingsman hoped that biohacking will become more normalized in the coming years.

"There's a lot of people that feel the next technological revolution will be in the human body. It's been the one part of nature that we regularly interact with that humanity hasn't looked at yet and asked 'how can we make big leaps forward with this?'" Kingsman said.

first years

One's first year as a Bronco brought with it a period of transition. First years met a lot of new faces but only remember the names of a few. From finding where a class is to eating at the Bronco late at night to forging new bonds with others, a Bronco's first year was special. First years brought curiosity, excitement and their creative spirits to the Bronco family.

Q: What do you look forward to in four years?

A: I look forward to meeting and learning from new people with different perspectives. I'm also hoping to make lifelong friends in the next four years, and that we'll make lots of fun memories.

Q: What has been your biggest adjustment?

A: My biggest adjustment since starting college has been creating a schedule for what works and other things to do in my free time. I was used to coming home at around 8 pm after extracurricular activities in high school but now I have much more time that I can either waste or use wisely.

Q: What has been your biggest adjustment?

A: My biggest adjustment in coming to college was establishing my footing and getting used to managing my entire day on my own. I tried to attend as many events and befriend as many people as possible right off the bat, which led to me burning out mentally by the end of week 2.

Q: What do you look forward to in four years?

A: I really look forward to expanding my network of friends and acquaintances through both my major, computer science, and my non-academic interests, like music and art. During these four years, I hope to land some awesome internships, go to as many concerts as I can, and build a solid circle of people I can depend on in my future life.

Q: What has been your biggest adjustment?

A: My biggest adjustment this quarter is trying to become more independent. I think it is crucial to be self-motivated and resilient because there are many challenges that a first-year needs to face in college. Knowing how to be more independent helped me to adapt to the college setting and cope with setbacks.

sophomores

As they walk around campus and gaze upon the familiar buildings and scenery, second year Broncos embraced their comfort with university life. They were more confident and knowledgeable of the different ways that they can get involved and make an impact on campus.

Grace Ling '19

Q: What changed about you after coming to college?

A: I became more open minded and empathetic due to the many opportunities that I decided to take on. My overall mental and physical endurance has also improved, as I take rigourous classes and run for the Cross Country and Track team.

Evan Haberle

Q: What changed about you after coming to Santa Clara University?

A: I have become more outgoing. I had to step outside my comfort zone and socialize a lot more to meet new people in all different classes and social circumstances. I have also become more responsible since I have to look after myself and my education without my parents and family around.

juniors

Junior year brought both the past and the future into perspective. At this point in their Bronco career, juniors focused on making the most of their time left at Santa Clara by investing in their academics, their social lives and their careers. Whether on campus or studying abroad, it was a time for creating cherished memories.

Q: What do you want to experience before you graduate?

A: Well, so far in my college career I've found myself pulled in many directions because there are too many things I care about, so before I graduate I guess I want to find something I love so much that I can't imagine my life without it.

Q: Best memory?

A: I would say my best memory in college so far has been the numerous "aha" moments that I experienced from classes to people that I had met. One of my relatives told me how patience is really important and I never fully understood why patience is important until I started taking calculus and physics classes.

Q: Best memory?

A: I don't think I have one best memory. I've really enjoyed being a part of different clubs such as LOOP, CLC, LEAD, and USAA because they have introduced me to amazing people that I will forever want in my life. The people in these clubs have inspired me so much.

Q: What do you want to experience before you graduate?

A: I want to see more events that better integrate the SCU community, like more concerts, and see things that are unique to the Bay Area.

Q: Best memory?

A: My best experience was when I went to Julian St Inn through SCCAP during my first year and I realized just how many opportunities there are on campus to learn how to be a better servant for the world. I loved being introduced to a community that cared about the impact they were having on their surroundings!

seniors

While the Class of 2017 began their journey as Broncos at various stages, they always embodied the Bronco values. Seniors were innovative, resourceful and determined. In reflecting on their last year, they remembered the classes they had taken, the friends they made and the nights spent at the Hut.

Q: What will you miss most about college?

A: My time at Santa Clara University has no doubt been the most transformative experience of my life and saying goodbye to a place that has given me so many opportunities will definitely be a daunting task. I will miss living with my seven housemates, within 10 minutes of my best friends and being in an environment where it is easy to meet people your age. The close-knit community and beautiful campus will be dearly missed as well, providing a beautiful backdrop to the rich and masterful experiences I have had. Leaving will definitely be one of the most bittersweet moments of my life but is a transition I am prepared to embrace and one that marks the beginning of a new chapter in my life.

Q: What was the most unexpected thing you did while in college?

A: Although I did a lot of amazing things in college: travel, join a sorority, participate in my first election, the most unexpected was becoming a division one athlete. As a sophomore I was recruited as a walk on to the women's rowing team. Despite never being that athletic and never being on a team before, rowing changed my worldview by teaching me about dedication, teamwork and loyalty. It's an opportunity that I never would have been given if I had gone to another school besides Santa Clara, and it has changed my life for the better.

Q: What will you miss most about college?

A: One thing I will miss the most is the friendly community on campus, especially the professors who've taught my class and the friends that I've made. Many of my professors have taught me a lot, from coding to drawing to film making, and they were an inspiring influence on me. I'm grateful to have met all of them. I've also made several close friends whom I will definitely be in touch with after graduation!

Q: What was the most unexpected thing you did while in college?

A: I traveled to Japan between my junior and senior years. I visited seven different cities over three weeks, and because I chose mainly non-tourist areas and activities, I was able to experience the authentic culture, traditions, and foods. While in Sendai for the Tanabata Festival, I was invited on stage to preform a traditional Obon dance, leading a crowd of local Japanese people. Before the dance, I was also asked to give an introduction of myself in Japanese.

Q: What will you miss most about college?

A: Friends and the time spend with friends are what I will miss the most after graduate from SCU. Even though we may not see each other again after graduation and the bonds and memories between us may start to fade, the truth that we shared great moments together will not be buried.

Q: What was the most unexpected thing you did while in college?

A: I would say that the most unexpected thing I did in college was to apply to and go through a fully German immersive program while studying abroad. All of my classes were in German and were taught by German professors at the local university. It was quite daunting to take exams in German but I'm happy that I took the risk and challenged myself.

dedications

Seniors did not get to the end of college on their own. They were helped along the way by various support systems. Friends, family members and loved ones commemorated their seniors and their accomplishments. These dedications were filled with cherished memories and heartfelt messages from loved ones.

Grant,
Thank you for being a wonderful
son and brother. We are so proud
of who you have become.

*You are
going to
change the
world. Can't
wait to see
what you do.*

Love,
Mom, Dad, Kevin, Derek, Lance
& Gucci

Congratulations Cayla. We are so proud
of you.

Love, Dad, Mom, and Noah

Congratulations Emily Rollo! We are so proud of you.
Love, Your Family

**Congratulations,
Laura!**

We are so proud of
you and all you have
accomplished in
earning your
Bachelor of Science
degree in
Mechanical
Engineering and a
minor in
Entrepreneurship.

**We love you so
much,
Your Family**

2017
CLASS OF

Behind you, *all your memories.*
Before you, *all your dreams.*
Around you, *all who love you.*
Within you, *all you need.*

maxwell
Abrams

Dear Maxwell,

Congratulations! We are all so proud of You and all your achievements that you have worked so hard for. Your unrelenting quest for knowledge has built a foundation that is sure to support all your future dreams. We are grateful for those (faculty, friends and family) that helped you in your journey. Life will never be work, if you continue to do what you Love. You are truly an amazing son, brother and friend!

We love you with all our heart,

Mom, Dad, Arie and Oma

Ryan Schulz

We are so very, very proud of you Ryan! You have worked very hard and put your heart into everything for so many years and have accomplished all you set out to do. You have earned all the good things coming your way.

We are excited for your future
and your new career!

We love you very much!
Dad, Mom, Kristen, Jennifer and Oma

AYSEL ATAMDEDE

The world is
yours.
The future is for
you to write.
Congratulations
Mom, Dad, and
Sean

Joseph Arturo Velladao

We are very proud of you! We hope that you take great satisfaction from graduating from an excellent university with a priceless asset, your degree! As you prepare for the next stage in your life, remember to enjoy life, accept the challenges of new experiences, pursue what you love and bring energy to everything you do and you will find happiness. We also hope that you continue to write as it is a gift which should be pursued with passion and purpose. Remember, "Every man without passions has within him no principle of action, nor motive to act."

Claude Helvetius
Love always, Pop, Mom and Dan

William Drake

"For me, I am driven by two main philosophies: know more today about the world than I knew yesterday and lessen the suffering of others. You'd be surprised how far that gets you."

-Neil deGrasse Tyson

Alexandra Cotroneo - Class of 2017!

The future belongs to those who believe in the beauty of their dreams - Eleanor Roosevelt
Congratulations! Love Mom and Dad

Congratulations Asad Amir Braswell! You Rock!

Asad,

You have been a stellar student since the 1st Grade and we are extremely proud of you. We are so blessed, grateful and thankful God chose us to be your parents. Throughout your journey in life please remember to believe in hard work. No one will hand you the future you want. The ladder to success can be steep, but take one step at a time and we're certain you'll get to the top. Always believe in yourself! Your happiness depends on no one else but you. If there is something you are unhappy about, change it. Keep God first. When you make a commitment, honor and cherish it. Don't ever forget you are unique. Be your best self! Give back and always keep your thoughts positive. Acknowledge your blessings. May every day of your life bring you fresh hopes for tomorrow. Enjoy life! Your entire family is extremely proud of you!

**With Love and Appreciation,
Mom and Dad**

matt

we are extremely proud of all that you have accomplished and look forward to celebrating your future successes

Love, mom & dad

Dear Matt,

We are so proud of you. You have grown up to be such an ambitious and caring young man. Your devotion to your family is incredible.

We know you are going to take PwC by storm and climb the mountains to reach the highest peaks.

Love, Momma, Aunty Em and Family

Congratulations!
Love, the Family

We love you and know you will be successful at anything you choose to do—as long as it does not include spelling!

closing

Graduation, the final curtain call. The seniors have been waiting for this unforgettable moment: when their name is called on stage, and they finally receive their diplomas. All of sleepless nights spent studying and the multiple times they have contemplated switching majors would be worth it. The graduating class of 2017 is hard-working, values social activism and seeks to create change. They capture the "Go Broncos" spirit. Their entire four-year journey has brought them to this point and shaped who they will become.

redwood

LETTER FROM THE EDITOR

It's finally done! This edition of The Redwood has been the product of a year of hard work on the part of the regular residents of Benson 12.

The yearbook is a sizable undertaking for any person or staff. The process of making this yearbook has been an exercise in understanding the ideals and realities of publications and doing everything possible to create the best possible final product, which you now have in your hands. I hope you enjoy having this edition as much as I enjoyed making it.

Overseeing this publication taught me a lot about my staff. I want to thank my editors for their long nights, including all of the extra deadline meetings that we had this year. All of the editors have driven this yearbook forward with their diligent work throughout the year. Also, to Ali, what are the odds that my first Santa Clara friend, established orientation session one, and I would end up being yearbook leaders together in our senior year. It's been a transformative four years, but I'm so glad we tackled this project together. I also want to thank the rest of my entire staff as well, because the content in this book would not exist without them. They start with blank pages and turn them into something worth remembering. It has been an honor seeing all of you grow as individuals, and I hope you've enjoyed participating in this process. You'll all go on to accomplish much more.

Lastly, this yearbook taught me about myself. I want to thank the leaders who have come before me—Ashley, Jonathan, and Nellie—who set an amazing example for me to follow. Your encouragement and legacies pushed me to pursue this role and give it my everything in the same way you all did. I've always thought it required a certain kind of person to participate in yearbook. Some say yearbooks are a dying media, but I disagree. There's a certain feeling you get when you crack open a freshly printed yearbook and turn through memories of that very year which is ending. It's the same feeling you get ten years from now when you pack up your yearbook during a move, and you can't help but thumb through some of the pages. It comes out again when one day your children pick the book up off a dusty shelf, and you take a trip down memory lane with them.

As this will be my tenth and final yearbook, creating them has been a significant chapter in my life. I'm sentimental that this chapter's closed now, but it's opened an entire world for me.

All the best,

VIVIAN STONEKING

The 2017 Santa Clara Redwood yearbook, volume 113, was produced by the yearbook staff at Santa Clara University in Santa Clara, California and was printed by Walsworth Yearbook Publishing Company in Marceline, Missouri.

The account was serviced locally by Nicole Gravlin, Walsworth Yearbook Sales Representative and at the publishing plant by Sharese Tollerton, Walsworth Customer Service Rep.

The cover was designed by Robert Schulte, and created by designer Jeremy Bingham and is printed on 160-point board with rich matte lamination and maroon hot foil and silk screen applications on the front and back cover. The endsheets are on Walsworth standard white matte endleaf stock.

425 copies of the book were ordered. The book's 240 pages are printed on 100 pound, matte, FSC - certified paper stock. The 113th volume includes 240 pages in full color. The fonts used in the book were as follows: Modern No. 20, and the Proxima Nova font family.

Layouts were submitted to the plant as pdf files uploaded online via company plugins. The Redwood was produced using Adobe InDesign CC 2015, on iMac and Mac Pro computers.

All photographs were post processed with Adobe Photoshop CC 2015.

Senior Portraits were taken by:
Ultimate Exposures
7011 Hayvenhurst Ave # C
Van Nuys, CA 91406

The Redwood was published for all undergraduate students at Santa Clara University for \$120. Our coverage ranges from September 2016 to March 2017.

Special thanks to our interim advisor, Samantha Kibbish, and advisor, Gordon Young, and to Nicole Gravlin for supporting this publication.
